

Question Number	Original Baseline Questions	Experience Level
1	You plan to move to one of the following cities— Seattle, WA; San Francisco, CA; Washington, DC— and would like to know the average income of females in each city for the last three years. You would like to come back to this information later. You wonder if there is any way to be able to access it all again without having to go through all those steps.	Expert
2	You would like to know the total number of finance and insurance companies in 2002, together. Then, you would like to make some comparisons between the two industries (finance and insurance). You don't want to see extraneous information, but you would like to see the information displayed with the number of employees first, payroll second and revenue last.	Expert
3	You would like to find a map that displays the counties in California with the most recent data on the average housing values of all homes that are owned (as opposed to rented). Is there a county in Southern California that has a price range between \$350,000 and \$540,000?	Expert
4	You are interested in the income of senior citizens living in each county in Florida in 2007. You would like to gather the number of households with retirement income and the total retirement income in each county. Once you have these data displayed together, you would like to arrange the data by the highest total retirement income. Then you would like to save your work for later reference.	Expert
5	You would like to know the percent of disabled people in Virginia who are at least 65 years old in 2006. You would also like to find the county with the highest percentage of disabled people. You are looking not just for the numbers but for a map for a presentation you are preparing. When you find the information, you would like to save it in a format that would allow you to insert it into a PowerPoint presentation.	Expert
6	You are looking for the number of health clubs in the following counties in Virginia: Prince William, Fairfax, Stafford, Fauquier, and Loudoun. When you find the information you need, you would like to save it for later use.	Expert
1	You are thinking about moving to Maryland and want to get as much information as you can about Maryland, including how many people live there. How many people live in Maryland?	Novice
2	You are doing research for a project on poverty and want to know which three states had the most people living in poverty in 2006. Are you able to print this information for later use?	Novice
3	You are doing a project about businesses in America through the years. You want to know what type of U.S. business had the highest amount of sales in 2002?	Novice
4	What percent of U.S. imports currently come from China?	Novice
5	How many people worked for the U. S. government in 2002?	Novice
6	You are doing a report on education and to better understand its relationship with environment, you would like the information displayed so that you can see exactly where these states are. Specifically, you want to know what percent of the total population in Virginia, Kansas, Maryland and Texas were college-educated in 2006.	Novice
7	You are working on a project that involves city limits and you are interested in finding the borders of the city of Fairfax in 2000. You would like this information to be displayed visually as you are a visual learner.	Novice
8	You are interested in demographic changes in the U.S. and want to know what the fastest growing age group was, over the age of 45, from 2006 to 2007?	Novice
9	You are interested in various states' overseas importing and exporting and specifically are interested in Idaho. You want to know which country Idaho increased exports with the most between 2003 and 2004.	Novice
10	You are interested in finding the average salary of households in Virginia and Maryland for 2007. Which state had the highest average household salary?	Novice

You plan to move to one of the following cities— Seattle, WA; San Francisco, CA; Washington, DC— and would like to know which city for the last three years. You would like to come back to this information later. You wonder if there is any way to be able to go through all those steps.

You would like to know the total number of finance and insurance companies in 2002. Then, you would like to make some charts (finance and insurance), so you would like to see the information displayed with the annual payroll first, revenue second, and assets third.

You would like to find a map that displays the counties in California with the most recent data on the median housing values of homes. Is there a county in Southern California that has a price range between \$450,000 and \$540,000?

You are interested in gathering data about County Business Patterns in 2008. Specifically, you are looking for a list of the Number of Employees by county. You're not interested in downloading employee or payroll data. You want to download the list in descending order to Excel.

You would like to know the percent of disabled people in Virginia who are at least 65 years old in 2006. You would also like to find the names of the disabled people. You are looking not just for the numbers but for a map for a presentation you are preparing. When you find the information, that would allow you to insert it into a PowerPoint presentation.

You are looking for the number of health clubs in the following counties in Virginia: Prince William, Fairfax, Stafford, Fauquier, and Loudoun. If you need, you would like to save it for later use.
