TIME BEGIN ____:____

Thank you so much for coming today. The BEATS Project invited you for this interview because we are interested in hearing from Black men ages 18-25 who have been arrested or incarcerated in jail or prison within the past 12 months. There is no time served requirement. Jail is defined as doing time in a city correctional facility. Prison is defined as doing time in a federal or state correctional facility. We hope that the information you give us in this interview will allow us to develop better health programs for Black men like yourself. There are 23 questions and it will take about one and a half hours to complete the interview.

I want to remind you that everything you say will be private to the extent permitted by law. This means we won't use your name during this interview, your name won't be on any notes we take or survey forms you fill out. We want to know the real deal, because that would be most helpful to us. So, please use any kind of words or phrases that you want and don't worry that you might offend me. There are no right or wrong answers. We are just interested in knowing what you really think. Do you have any questions?

HIV TESTING AND YOUNG BLACK MEN

One of the reasons we asked those questions about your HIV testing experience is that young Black men recently arrested or released from

jail/prison are at higher risk for getting HIV than those who haven't been incarcerated. Many young Black men have never been tested for HIV and so I want to ask you some questions about this.

15. In your opinion, what are some of the reasons that young Black men recently arrested or released from jail/prison do not get tested for HIV once they are back in their communities?
