

1405-0158 Justification Document 6/26/2008

This collection seeks a no material and non-substantive change to an already approved generic collection with the addition of pre program, post program and follow-up surveys for ECA program participants, as well as a set of new questions for a new program evaluation.

Each survey with the exception of the Journalism and Media Evaluation survey uses questions from the pre-approved Question Bank. Due to the nature of this new evaluation (*Journalism and Media*), which was developed after the creation of the Question Bank, questions did not already exist within that database necessary to collect the data required. Therefore, new questions had to be used because of the specific nature of this evaluation. This new set of questions for approval has been compiled and submitted in a separate document.

The total burden for these surveys is 1,080 hours. 1,080 hours will be deducted from the generic collection total resulting in a new total of 10,866 hours, while 3,678 respondents will be deducted from the generic collection total resulting in a new total of 19,623 respondents.
