## FY 2006 CDFI Transaction Level Report: Data Point Guidance

This document provides guidance for the Fiscal Year (FY) 2006 CDFI Transaction Level Report (TLR) data points.

The FY 2006 version of CIIS is CIIS 4.1.

In previous versions of CIIS, loans and investments were referred to as “transactions.” In CIIS 4.0, individual loans and investments are also referred to as “Financial Notes.”

### Which Loans and Investments to Include in the TLR

Include all loans and investments that were outstanding at any time during the reporting period. Exclude any New Markets Tax Credit (NMTC) activity that was funded by Qualified Equity Investments (QEIs). ***The reporting period for the FY 2006 TLR is the Organization's fiscal year ending in 2006.***

All data must be reported as of the reporting period end date unless otherwise noted. The data identified as “**Annual Update Required**” (Principal Balance Outstanding, Days Delinquent, etc.) is not static. Please respond “as of” the reporting period end date. *For example, for each loan, report the principal balance outstanding and number of days delinquent on the last day of the reporting period.*

### QuickStart Instructions

The new “QuickStart” Instructions include basic information about CIIS 4.0 in an Excel spreadsheet. The QuickStart contains summary information that users can sort by topic. Definitions for the columns can be found on the second worksheet. The QuickStart identifies the following for all CIIS 4.0 data points:

- New CIIS 4.0 data points;
- Mandatory data points;
- Conditionally required data points (including conditional requirements);
- Compliance data points;
- Data points that are specific to Transaction Type, Purpose, and Borrower/Investee Type; and
- Special Instructions.

The QuickStart is a supplement to this guidance and are available at [www.cdfifund.gov/what\\_we\\_do/ciis.asp](http://www.cdfifund.gov/what_we_do/ciis.asp).

### TLR “Project” Guidance

Many CDFIs are financing single Projects with more than one Financial Note (e.g., loan, line of credit, or equity investment). CDFIs will now be able to report which Financial Notes belong to a single Project.

The Fund requires that each Financial Note that finances a single project have the same:

- Borrower (indicated by Client ID);
- Investee Address;

- Project Address or set of Project Addresses; and
- Total Project Cost.

**Additional CIIS 4.0 Changes**

**New CONDITIONALLY REQUIRED data points**

The following data points are Conditionally Required for the entire FY 2006 TLR, including transactions that were previously reported.

Projected Impacts – Additional Clarification:

- Projected Jobs to be Created at Businesses Financed
- Projected Jobs to be Created - Construction
- Square Feet of Real Estate - Total

**New OPTIONAL data points**

The following data points are Optional for the entire FY 2006 TLR, including transactions that were previously reported.

- Project Number – Allows users that provide more than one loan or investment to a single Project to link multiple Originator Transaction IDs to that Project.
- Total Project Cost – Affiliates & Related Programs
- Projected Jobs to be Created at Tenant Businesses
- Community Facilities

**Changes to Existing Data Points**

The PURPOSE options have changed:

- "Business - Fixed Assets" and "Business - Working Capital" have been removed.
- "Business" and "Microenterprise" have been added.

The AMORTIZATION TYPE options have changed:

- "Balloon" has been removed.
- "Non-amortizing" has been added.

The GUARANTEE options have changed:

- "Personal Guarantee" has been added.

The COLLATERAL TYPE options have changed:

- "Personal Guarantee" has been removed.

**Understanding the Data Points**

**Example 1**

<b>C</b>	<b>Originator Transaction ID</b>	
	Assign a unique identifier to each Financial Note. The Originator Transaction ID is typically a loan number or tracking number. The Originator Transaction ID is used to track Financial Notes across reporting periods.	
	<b>MANDATORY DATA FIELD</b>	
	<b>Validations:</b>	<ul style="list-style-type: none"> <li>• Each Originator Transaction ID may only be used for one Financial Note per reporting period.</li> <li>• CDFIs MUST use the same Originator Transaction ID for each reporting period that a particular Financial Note is submitted.</li> </ul>
	<b>Excel Data Format</b>	Text (20 characters)

**Example 2:**

<b>AT</b>	<b>Principal Balance Outstanding</b> For each loan and line of credit, report the principal balance outstanding at the end of the reporting period.		
	<b>CONDITIONALLY REQUIRED IF:</b>	Transaction Type = • Term Loan • Line of Credit OR • Debt with Equity	
	<b>Reject If:</b>	Transaction Type = Equity Investment	
<b>COMPLIANCE</b>			
<b>Annual Update Required</b>			
	<b>Excel Data Format</b>	Numeric	

**Example 3:**

<b>K</b>	<b>Interest Type</b> For each loan and line of credit, report the type of interest.		
	<b>Reject If:</b>	Transaction Type = Equity Investment	
	<b>Crosswalk Values / Definitions</b>	FIXED	Fixed
		ADJ	Adjustable

**Excel Column**

The Excel Column is found in the first row to the left of the Data Point Box. The Excel Column refers to the column where a data point is located in the Excel Template. The Excel Column is provided for referring, searching, and ordering data points.

- *Example 1:* “Originator Transaction ID” data point is located in Column C.

**NEW**

“NEW” appears below the Excel column for any data points that are new in CIIS 4.0.

Data Point Name

The Data Point Name is indicated in Bold in the first row of the data point box.

- *Example 1:* Data Point Name is “Originator Transaction ID.”

**Guidance**

Guidance for each data point is provided directly below the Data Point Name.

**Mandatory, Conditionally Required, and Optional Data Fields**

Mandatory data points must be reported for every transaction. CIIS will not validate transactions that do not include the Mandatory data points.

- Mandatory data points are indicated by “MANDATORY DATA FIELD” and double bold borders around the Data Point Box (as in the *Example 1*).
- The Online entry system displays  next to Mandatory fields.

Conditionally Required data points must be reported for a transaction if the noted conditions apply.

- Conditionally Required If data points are indicated by “CONDITIONALLY REQUIRED IF” and a single bold border around the Data Point Box (as in *Example 2*).
- *Example 2:* If the Transaction Type for the Financial Note is Term Loan, Line of Credit, or Debt with Equity, the user must provide a valid response to Principal Balance Outstanding.

Users are not required to provide responses for Optional data points. Optional data points are indicated by a single border around the data box (as in *Example 3*).

### Compliance Data Points

Compliance data points may be used to measure a CDFI's compliance with their Assistance Agreement. Any field that may be used for compliance purposes for any CDFI is identified as a Compliance data point. Awardees must refer to their specific Assistance Agreement(s) to determine if the data point is relevant to their organization's compliance.

- Compliance data points are indicated by "COMPLIANCE" and blue shading (as in *Example 2*).
- The Online entry system displays a  next to Compliance fields.

### Reject If

CIIS will generate an error if a response is provided when a "Reject If" condition applies. "Reject If" is intended to eliminate responses that do not make sense: for example, providing an interest rate for an equity investment. When a "Reject If" condition applies, the user should leave the response blank.

- *Example 2:* If the transaction is an Equity Investment, CIIS will not accept Principal Balance Outstanding entry.

### Validations

In order to certify and submit the TLR, the data must pass a number of validation rules. Validation rules are provided in the data boxes.

- *Example 1:* CIIS will not accept the same Originator Transaction ID for more than one Financial Note per reporting period.

### Annual Update Required

CIIS requires users to update certain data points each year if they have changed since the previous reporting period. These data points are noted with "Annual Update Required" in a yellow box.

- *Example 2:* Users are expected to update the Principal Balance Outstanding annually.

### Excel Data Formats

The Excel Data Format describes the required format to upload the Excel Template. In general, users should refer to the Excel Data Format to determine the type of data CIIS requires.

- *Example 1:* CIIS will accept text entries.

### Crosswalk Values/ Definitions

The Crosswalk Values / Definitions provides the valid CIIS responses for data points that are not numeric or open-ended text.

- *Example 3:* "Fixed" and "Adjustable" are valid responses to Interest Type in CIIS. CIIS will accept the values crosswalked to "FIXED" and "ADJ" in an Excel or XML upload.
- XML and Excel uploads: Values will be indicated in the Crosswalk.
- Manual Entry: Values appear in the dropdown menus.

## Addresses

### Address Guidance

Users must report one Investee Address (or FIPS Code) and one or more Project Addresses (or FIPS Codes). Users may provide the same address for the Investee Address and Project Address, if appropriate.

- Investee Address/FIPS Code refers to the investee's/borrower's address. Investee Address is the home address when the borrower is an individual and the business address when the borrower is a business.
- Project Address/FIPS Code refers to the location of the business or other real estate for which the loan or investment is being used. For business investees/borrowers, if the Project Address is different from the Investee Address please provide the Project address. If the loan or investment is funding multiple projects at different locations please provide the address of each location.
- FIPS Code refers to the 11-digit Federal Information Processing Standards codes that indicate state (first 2 digits), county (next 3 digits), and census tract (last 6 digits). FIPS codes must be provided if CIIS is unable to geocode an address. For additional information about FIPS codes, visit [www.census.gov/geo/www/fips/fips.html](http://www.census.gov/geo/www/fips/fips.html).

During the TLR address verification process, CIIS will attempt to geocode each address (identify the location on a digital map). CIIS will notify the user of each transaction address that the system was not able to geocode, if any.

- ***CIIS cannot geocode rural or "new" addresses that are not available in the geocoding database.***

***The Fund recommends that organizations confirm that all addresses are geocodable in CIMS (the Fund's CDFI Information and Mapping System) prior to reporting in CIIS.***

This extra step will save the organization time and effort in the reporting process. CIMS is available through the "Mapping" link in your organization's myCDFIFund account. For more information about CIMS, please visit [www.cdfi.treas.gov/mapping](http://www.cdfi.treas.gov/mapping).

### The 11-Digit FIPS

CIIS collects an 11-digit FIPS:

- **State:** The **first two digits** of the FIPS represent the state.
  - A list of state codes is available at: [www.census.gov/geo/www/cenpop/statecenters.txt](http://www.census.gov/geo/www/cenpop/statecenters.txt)
- **County:** The next **three digits** of the FIPS represent the county.
  - A list of county codes available at: [www.census.gov/geo/www/cenpop/county/ctyctrpg.html](http://www.census.gov/geo/www/cenpop/county/ctyctrpg.html)
- **Tract:** The last **six digits** of the FIPS represent the census tract.
  - The directions below provide one option for identifying the census tract using the U.S. Census Bureau's website.
  - If only four digits are provided for the census tract code, add two zeros before the tract number.
  - If only two digits are provided for the census tract code, add two zeros before the tract number and two zeros after the tract number.

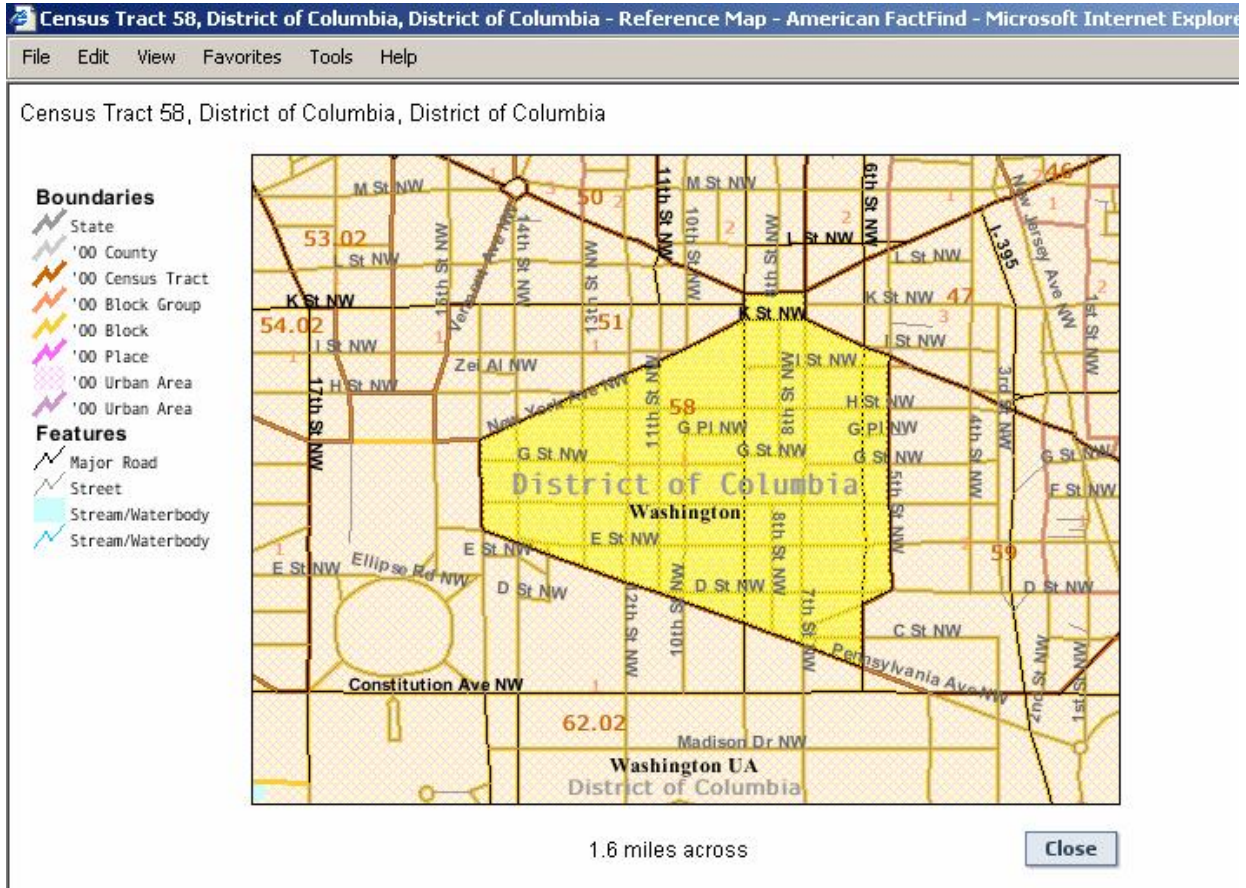

### How to Obtain a Census Tract for the FIPS Code

The Fund offers the following suggestion for obtaining a FIPS for addresses that cannot be geocoded in CIIS:

- Visit the U.S. Census Bureau's website at [www.census.gov](http://www.census.gov).
- Select "American Fact Finder" from the left column of the Census Bureau's Homepage.
- Select the "street address" hyperlink from the left column under "Address Search..."

FY 2006 CDFI Transaction Level Report: Data Point Guidance

- Enter the specific address and click the “Go” button.
  - If the census is unable to geocode the address, you will need to enter the address of a nearby site.
  - Continue to enter nearby addresses until the Census website is able to geocode the address.
- Select “Census Tract” from the list of geographic options and click the “Map It” button.
- Use the map provided to “eyeball” the desired location and census tract.
- Please print out a copy of the map for future reference.
