Public reporting burden of this collection of information is estimated to average 45 minutes per response,, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer; 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; Attn: OMB-PRA (0920-XXXX)

HIV PREVENTION COMMUNICATION AMONG BMSM  
Items for Personal Interview (Qualitative Data Collection) – for 3 Month Follow-Up

PREVENTION COMMUNICATION

- 1) On average, how often have you spoken with the following people in your social circle about HIV prevention and HIV testing issues within the last 3 months? (Answer in instances, e.g., every time we get together)
  - a. Friends
  - b. Peers and acquaintances (who you may not necessarily call your “friends”)
  - c. Your sexual partner(s)
- 2) What has changed about the way you have spoken to them now about these topics compared to before 3 months ago?
- 3) What else would you like to tell me about these topics that you may not have told me before OR that you would like to clarify from the last time we spoke (3 months ago)?
