

"Preventing HIV Risk Behaviors among Hispanic Adolescents"

## **Attachment 5a: Recruitment Flyer**

Dear Parent,

Miami Senior High (MSH) and Coral Gables Senior High (CGSH) schools are working with the University of Miami's Center for Family Studies, to promote healthy growth among Hispanic ninth graders. The University of Miami is sponsoring a research study called, *Preventing HIV Risk Behaviors among Hispanic Adolescents*, at our school that will begin later this year. The goal of the study is to prevent risky sexual behavior and drug use in Hispanic youth by helping to improve the ways families talk to and support each other.

There will be two groups in this study. If you are part of one group, you will be involved in weekly parent groups to learn about protecting teens from risks like drug use and risky sexual behavior. You will be able to talk about your thoughts related to these issues with the groups. Also, you and your teen would take part in a family visit with a staff member from the University of Miami. This research is free of charge.

Staff members at the Center for Family Studies would like to meet with you to discuss ways in which the research study may help you and your family. Please fill out the section below, and return it to the school. Thank you very much. We look forward to hearing from you.
