## FAMILY LIFE CHANGES

Over their life cycle, all families experience many changes as a result of normal growth and development of members and due to external circumstances. The following list of family life changes can happen in a family at any time. Because family members are connected to each other in some way, a life change for any one member affects all the other persons in the family to some degree. **"FAMILY"** means a group of two or more persons living together who are related by blood, marriage or adoption. This includes persons who live with you and to whom you have a long term commitment. **Directions:** "Did the change happen in your family?" Please read each family life change and decide whether it happened to any member of your family - **including you** - during the past 6 months and check **Yes** or **No**.
