H-20678 - RESOURCE COLLECTION AND EVALUATION OF HUMAN TISSUES AND CELLS FROM DONORS WITH AN EPIDEMIOLOGY PROFILE FOR NCI CONTRACT # N02-RC-57700

APPROVAL VALID FROM 8/13/2008 TO 8/13/2009

Dear Dr. JONES

This is to certify that the Institutional Review Board for Human Subject Research at University of Maryland Baltimore has approved your research protocol.

Research activity involving veterans and/or the Baltimore VA Maryland Healthcare System (BVAMHCS) as a site, must also be approved by the BVAMHCS Research and Development Committee prior to initiation. Contact the VA Research Office at 410-605-7131 for assistance.

The study may not continue after the approval period without additional IRB review and approval for continuation. You will receive an email renewal reminder notice prior to study expiration; however, it is your responsibility to assure that this study is not conducted beyond the expiration date.

Please be aware that only IRB-approved informed consent forms may be used when written informed consent is required.

Any changes in study or informed consent procedure must receive review and approval prior to implementation unless the change is necessary for the safety of subjects. In addition, you must inform the IRB of adverse events encountered during the study or of any new and significant information that may impact a research participants' safety or willingness to continue in your study.

The UMB IRB is organized and operated according to guidelines of the International Council on Harmonization, the United States Office for Human Research Protections and the United States Code of Federal Regulations and operates under Federal Wide Assurance No. FWA00007145

If the Investigational Drug Service is utilized for this research study, it is the principal investigator's responsibility to notify the IDS of all IRB-approved changes to this protocol that involve investigational agents.

Sincerely yours,

A handwritten signature in black ink that reads "Robert Edelman, M.D.".

RE: H-20678 - RESOURCE COLLECTION AND EVALUATION OF HUMAN TISSUES AND CELLS FROM
DONORS WITH AN EPIDEMIOLOGY PROFILE

The IRB has approved the modification request detailed below.

Description:

The Laboratory of Human Carcinogenesis at The National Cancer Institute has been approved to conduct a case control study of Prostate Cancer. We are requesting an amendment to the current study because the Case Control Study of Lung Cancer and the new Prostate study are designed to work together. The population control group from the Case Control Study will be utilized in the Prostate study as well. This will be further illustrated in the following sections: C, D, F1, F3, F4, G1, G2, H, I, J1, J2, L, N, and Section S. Also we would like to request certain changes to the subject's rights section of the following consent forms: Prostate Study Cases - V A, Prostate Study - U M M S, Population Controls - Male. The subject's rights changes for the consents are attached in section S. In addition we would like to request that the IRB change the study ID number #0298229 on the HIPAA waiver and the Authorization form form to the new BRAAN IRB number of H-20678.

Protocol Version and ID #: N/A

This is to certify that the University of Maryland, Baltimore (UMB) Institutional Review Board (IRB) has approved the above referenced modification request for the protocol entitled, "Resource Collection and Evaluation of Human Escapes and Catches from Denours with an Epidemiology Profile for NCI Contract #N02-RC-57700".

Investigators are reminded that the IRB must be notified of any changes to the study or informed consent procedures. In addition, the PI is responsible for ensuring prompt reporting to the IRB of proposed changes in a research activity, and for ensuring that such changes in approved research, during the period for which IRB approval has already been given, may not be initiated without IRB review and approval except when necessary to eliminate apparent immediate hazards to the subject (45 CFR 46.105-4(iii)).

The UMB IRB is organized and operated according to guidelines of the International Council on Harmonization, the United States Office for Human Research Protections and the United States Code of Federal Regulations and operates under Federal Wide Assurance No. FWA00007143.
