

## **MCBS Blaise/WVS CE. Restart**

Clicking on the BREAKOFF link in the Blaise/WVS instrument allows the interviewer to stop the interview prior to completing it through the Closing section. BREAKOFF is allowed at every screen in the instrument except in the following sections: IN, ENS, EN, and CL/AV. When the BREAKOFF link is selected, the program routes to a closing screen where the interviewer can assign the appropriate interim disposition code. The variable MRES.EVRESTRT is set to "1/Yes".

When the interview is restarted, the instrument first goes to screen IN2, where the SP's name is verified. Screen CE1 is displayed next and provides the interviewer with detailed information about when and where the BREAKOFF occurred. The interview is finally routed to one of the screens listed in BOX CE1.

Review screens are presented during a restart interview when the breakoff occurred either in the HI section, any of the utilization sections (except UTS), or the ST section. These screens are similar to those that an interviewer can currently view using the CTRL/I function in Cheshire.

After reviewing the CE screens, the interviewer is instructed to click on the "JUMPBACK" link to return to the appropriate place in the interview.
