DESIGN NOTES

The AC section collects Access to Care information based on the SP's Emergency Room, Outpatient and Medical Provider visits.

The AC section is asked in its entirety for Supplement sample following the DM section.

The Continuing sample receives a subset of AC questions based on ER, OP, and MP utilization in the current round. If the SP reports a current round ER visit, we ask AC6A while administering ER. If the SP reports a current round OP visit, we ask AC9-AC16A while administering OP. If the SP reports a current round MP visit, we ask AC20-AC28A1 while administering MP. Once MP is complete, the AC section is administered to the continuing sample. The SP will receive ER, OP, MP related questions in AC based on whether or not the SP reported an ER, OP or MP visit during the past year. The AC questions will only be asked once, therefore if the SP has already received a subset of the AC questions in ER, OP, and/or MP, these questions will be skipped while administering AC.
