Search, List and Select Project Records

Search Projects Page			
Search Projects by			
Title:	If entered, search will be done against the entire Title field as a "contains."		
Assigned-To:	If entered, search will be done as an exact match against the Assigned-To field. (Refer to Note 3)		
Created-By:	If entered, search will be done as an exact match against the Created-By field. (Refer to Note 3)		
Status:	If entered, search will be done for either Open/Closed against the Status field. << dropdown list		
Date Project Created Range	From:	To:	<< logical edits both or either field may be empty
Returned List of Selected Project Records			
Title, Assigned-To, Created-By, Date Created, Edited-By, Date Edited, Status & Project Record ID fields ordered alphabetically by Title			
Title, Assigned-To, Created-By, Date Created, Edited-By, Date Edited, Status & Project Record ID fields ordered alphabetically by Title			
Title, Assigned-To, Created-By, Date Created, Edited-By, Date Edited, Status & Project Record ID fields ordered alphabetically by Title			
List* & Allow Selection**			
<i>(* The Returned List of Selected Project Records might return multiple projects)</i>			
<i>(* The Returned List of Selected Project Records will return all projects when the user does not supply search parameters)</i>			
<i>(** User might select a Project record to access through the AddViewEditProject page)</i>			
<i>(** User might select a Project record to list its Relationship, Note, and Research Item records to view and potentially (Uncheck [] Check-box) remove the record's link-to the Project; or to (Check [x] Check-box) to link an unattached Note and Research Item record to the Project (Exhibit-B))</i>			
<i>(** An Administrator user might select a Project to list its Relationship, Note, and Research Item records; If there are none linked-to the Project record, the Administrator user can delete the Project record (Exhibit-B))</i>			
<i>(** User might select a Project record to list Relationship records linked to the project and additional searched for Relationship records to either remove-or-create Relationship to Project links (Exhibit-C))</i>			
<i>(** User might select a Project record to generate a report that includes all Relationship, Tip, Note, and Research Item records linked directly-or-indirectly to the Project.)</i>			
Notes:			
1. Note and Research Item records linked to a different Project, a Relationship, or a Tip will not be listed on the Project list (Exhibit-B)			
2. To reassign a Note or Research Item record linked to a Project, the user must first ([] Deselect) "remove" its Project link (Exhibit-B)			
3. To remove a Relationship record's link to a Project, the user must select the Project to list the Relationship on that Project's page; then uncheck its [] Check-box (Exhibits-B & C)			
4. The system will support User entry of Assigned-To and Created-By search parameters through the "JNS/Username-Name Table." The system will present a list of the Username/Names alphabetically by Last Name, First Name, Middle Name for the user to select the JNS/Username to be used as a search parameter. Both the Username and Name will be shown in the "Search Projects by" Assigned-To and Created-By text boxes; only the Username will be used as a search parameter. The "Returned List of Selected Projects" will list the Created-By & Edited-By "Last Name, First & Middle Name" through the same conversion process.

Detailed Description:					
Display Sanitized Tip: (Note "F") [] Do not identify me or my organization as the submitter of this information within the SENTRY GIS map					
Buttons	Save Tip	Information	Search/AddView/Edit/Select Source of Info	Access Add/View/Edit Tip's Notes/Research	

SENTRY Internal
Add/View/Edit Tip

Note A * Project is present when the Tip is linked directly-or-indirectly to a "Project" - see Exhibit {E} for listed fields

Note B * Relationship is present when the Tip is linked-to a "Relationship" - see Exhibit {E} for listed fields

Note C * Multiple Project/Relationship lines will be present when the Tip is linked-to a Relationship that's linked-to multiple Projects or to a Tip that's linked-to multiple Relationships

Note D * **Tip Status:** **New** (Initial, not generally available); **Active** (Reviewed, PII (if any) Removed, Available for use by all); **Closed** (Previously Active, no further action to be taken); **Canceled** (Never Active, Deemed incomplete or other, available only to Administrator (In case the Tip was inadvertently "Canceled" the Administrator can revise it's status.)

Note E * The Initial Contact "Contacted By" field will present the user's Name who created a Note record that documents his initial (follow-up) contact with the Tip submitter; the Contacted Date and Time fields will present the Date and Time entered on the Note screen that documents when the initial contact was made.

Note E * Exception: When Tip is entered internally through this AddView/Edit page the Submitted Date/Time, Edited By, Edited Date/Time, Contacted By and Contacted Date and Time will be updated with the username of the user adding the Tip record and the date/time of its addition.

Note F * The user will update the "Display Sanitized Tip" field to indicate whether-or-not the Sanitized Tip is available for display on the external web site's GIS map. When an externally submitted (Tip) information record is created or a Tip is added through this AddView/Edit page the "Display Sanitized Tip:" response field is set to "No." When the field from this the response field is << supported by a dropdown list (Yes or No)

Note G * All of the Tip's "Source of Information" fields are pulled from either the Source Identification table or the internal copy of the external User Account Table

- The ability to access functionality for the selection of existing Source Identification or User Account records directly from this page is required.

(The selection process will include the ability to enter these search parameters:

Last Name, Organization Name, and Role

all search parameters shall be matched against the table fields left-most positions except for Organization Name, Org-Name will use a "contains" search against the Organization Name, Organization Level-2, and Organization Level-3 fields as an "or" condition to satisfy a matched condition for this search parameter; all entered search parameters are considered "and" conditions (any "contains" match within the organization fields; and matches for all other entered search parameters) to include the table record in the returned list)

(The selection process will not require search parameters, if none all Source Identification and User Account records will be included in the returned list)

- The returned list will include the following fields:

Last Name, First Name, Middle Name, Organization Name, Organization Level-2, Organization Level-3, Title/Position, Role, Phone, FAX, and E-mail Address listed left-to-right and ordered by Last Name

(Since the same SearchListSelect of Source Identification and external User Account records will be used to attach a source to an internally submitted tip as its source of information, fields not presented on the Note and Research Item pages are included in the returned listed)

- The ability to access the add source identification record function, add a new source record, then select the new source identification record from this page is required.

- The ability to replace a Tip's linked-to source record with another is required (for Internally submitted tips only).

- The internal copy of the external User-Account table is required to support these search, list, and select functionality.

SENTRY Internal
Add/View/Edit Tip

Note H * The system must ensure that the Tip Number/ID does not duplicate a Tip Number/ID of an externally submitted Tip.

SENTRY

Add/View/Edit Research Item Information

Note E * All of the Note's "Source of Information" fields are pulled from either the Source Identification table or the internal copy of the external User Account Table

- The ability to access functionality for the selection of existing Source Identification or User Account records directly from this page is required.

(The selection process will include the ability to enter these search parameters:

Last Name, Organization Name, and Role

all search parameters shall be matched against the table fields left-most positions except for Organization Name, Org-Name will use a "contains" search against the Organization Name, Organization Level-2, and Organization Level-3 fields as an "or" condition to satisfy a matched condition for this search parameter; all entered search parameters are considered "and" conditions (any "contains" match within the organization fields; and matches for all other entered search parameters) to include the table record in the returned list)

(The selection process will not require search parameters, if none all Source Identification and User Account records will be included in the returned list)

- The returned list will include the following fields:

Last Name, First Name, Middle Name, Organization Name, Organization Level-2, Organization Level-3, Title/Postition, Role, Phone, FAX, and E-mail Address listed left-to-right and ordered by Last Name

(Since the same SearchListSelect of Source Identification and external User Account records will be used to attach a source to an internally submitted tip as its source of information, fields not presented on the Note and Research Item pages are included in the returned listed)

- The ability to access the add source identification record function, add a new source record, then select the new source identification record from this page is required.
- The ability to replace a Note's linked-to source record with another is required.
- The internal copy of the external User-Account table is required to support these search, list, and select functionality.

Note F * Provide the ability to scroll through Notes and Research Items linked-to this same Project, Relationship, or Tip

Note G * Provide the ability to add an additional Abuse Info record or access functionality to add a Note or a different Research Item record type that will be linked-to this same Project, Relationship, or Tip
