<sup>1</sup> See instructions booklet for description.

<sup>2</sup> Since heat sink blanks, fabricated heat sinks, and finished heat sinks are considered part of the scope of "aluminum extrusions" any sales of heat sinks (regardless the level of processing) should have been reported in part II of this questionnaire as commercial shipments. Here, if your firm further fabricates heat blanks (before sale to a third party), you should report those as internal consumption.

<sup>3</sup> Internal consumption and transfers to related firms of any heat sink blanks must be valued at fair market value (*i.e.*, what the heat sink blank would have sold for in the market in an arms'-length transaction). In the event that you use a different basis for valuing these transactions, please specify that basis (*e.g.*, cost, cost plus, *etc.*) and provide value data using that basis for each of the periods noted above:

- (b) **Fabrication.**--Does your firm further fabricate heat sink blanks in the United States (see instruction booklet for definitions), *i.e.*, cut-to-length and other processing to transform the heat sink blank into a finished product?

No                       Yes, partially  
 Yes, fully

Please describe the fabrication processes your firm provides (be specific and detailed, *i.e.*, do not just use terms such a "precision engineering" without defining what exactly the production and fabrication processes employed by your firm are):

---

---

- (c) **Finished heat sinks.**--Does your firm conduct in the United States the additional processes and procedures (*i.e.*, testing, quality controls, et cetera) on fabricated heat sinks to enable the fabricated heat sinks to be sold as a finished product to end users, such as IBM, in the electronics market?

No                       Yes.--Please describe these processes and procedures in detail (be specific and detailed).

---

If your firm reported "No" to both question V-2(b) and V-2(c), please skip to question V-5.

- V-3. **Constraints on production of finished heat sinks.**--From the perspective of a producer of the finished heat sinks, in which either the heat sink blanks or partially fabricated heat blanks are the input into production, what is your firm's overall production capacity for producing finished heat sinks? Please also describe the fixed versus variable nature to reported capacity and indicate whether your firm faces any constraints to the production of finished heat sinks other than availability of input products.
