**Subject:** public comment on federal register FW: waste waste waste of tax dollars at tis agency-all it does is take surveys of stupidity

this nation should not be spending hard earned tax dollars on surveys of kids dating relationships. what an absolutely asinine idea.

parents make the rules and parents have the answers. very very high priced employees at cdc are hired who tell us when hired they know the answers and have studied it for years. why then after they get hired are the taxpayers asked to fund this absolutely asininely stupid survey?

there is no reason to have a survey of 11 year old dating relationships. none. somehow these high paid bureaucrats at cdc want to do the work of \$30,000 a year survey takers when we are paying them 4 times that amount to have the answers. something is radically wrong at cdc.

spending like this in a time of economic chaos makes no sense at all. the usa is a debtor nation and this is the crap our reps in government come up with? the taxpayers of this country are sick of this stupidity in our washington govt. in no way should the beleaguered taxpayers of this country be asked to pay for this stupidity of a survey. this is why we are a debtor nation--govt stupidity like this. the cdc needs to be downsized. they are not doing important work at all.
