The U.S. Census Bureau requests your participation in the Building Permits Survey. The enclosed Form C-404, "Report of Privately-Owned Residential Building or Zoning Permits Issued," requests summary information on residential building or zoning permits issued by your office during calendar year 2008. Please mail or fax this information by the date shown at the top of the form. If your office has changed status, such as no longer requiring permits or having merged with another office, please check the appropriate box in section 2 and provide a summary of the change in section 5.

The information you supply is important. It allows us to produce estimates of construction of new housing units, the largest component of the construction industry. Data users rely on your detailed geographic data to monitor growth and develop production and marketing strategies.

The data that you provide are used by the Census Bureau in the annual creation of population estimates, used by government agencies to allocate funding and other resources to your local area and for various planning purposes. The data are also used to estimate local area populations for the years between the decennial censuses.

If you have any questions, please refer to the instructions on the back of the form or call the Residential Construction Branch on 800-845-8244. Thank you in advance for your participation in this voluntary survey.

Sincerely,
