

## Topographic and Bathymetric Data Survey: Phone Conversation and Instructions

1. I am looking for information about elevation data for your county/state/region/area. Are you the right person to talk with?
2. If not, with whom should I speak?
3. What type of elevation data exists for your county/state/region/area?

If USGS National Elevation Dataset only, the phone call is concluded and the appropriate information is inserted into the database.

If there is another data set (e.g. lidar, photogrammetrically derived elevation, ifsar, bathymetry, etc.), the respondent is asked if they are willing to provide information about the data.

If willing, these respondents will be provided with the electronic data survey and will send back the completed survey.

Paperwork Reduction Act Statement: Public reporting burden for this collection of information is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other suggestions for reducing this burden to Chris Ellis, National Oceanic and Atmospheric Administration; [chris.ellis@noaa.gov](mailto:chris.ellis@noaa.gov).

No personally identifying information will be recorded, other than the name of the appropriate person to referred elsewhere. Notwithstanding any other provisions of the law, no person is required to respond to, nor shall any person be subjected to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number.
