SUBJECT: Health Resources and Services Administration Health Center Program
              Application Forms — OMB No. 0915-0285

This is a request for a non-material or nonsubstantive change to a currently approved
OMB approval for the Health Resources and Services Administration's Health Center
Program Application Forms, for entities who are specifically participating in the School
Based Health Center Capital Program. The current OMB approval under OMB No.
0915-0285 expires in 10/31/2013.

The Health Resources and Services Administration (HRSA) administers the School-
Based Health Center Capital (SBHCC) Program, as authorized by the Patient Protection
and Affordable Care Act (Affordable Care Act) ((P.L. 111-148), Title IV, Section
4101(a)).

School-based health centers (SBHC) are a major component of the nation's health care
safety net. SBHCs not only enable children with acute or chronic illnesses to attend
school, but also improve their overall health and wellness through health screenings,
health promotion, and disease prevention activities. The SBHCC grants will address
significant and pressing capital needs to improve delivery and support expansion of
services at SBHCs.

The following form includes the non-material/nonsubstantive change to the Health Center
Program Application Forms: Proposal Cover Page, IC Part II, # 26. The changes are
detailed below:

- FTEs were removed from the SBHCC application since the Affordable Care Act
  does not require this information.
- The section Green/Sustainable Design Practices were also removed from the
  SBHCC Proposal Cover, since it was not addressed within the Affordable Care
  Act.
- The Financial Management and Control section were renamed to
  Resources/Capabilities, since SBHCC applicants and sites are not expected to
  existing grantees.

The program does not anticipate a change to current and approved burden estimates.

                              Nidhi Singh
