

Example:

***M. tuberculosis*/NTM Case History Form – NTM Supplemental Information**

Strain O – *M. marinum* Case History

| | |
|-------------------------|--|
| Patient: | 39-years old |
| Gender: | Male |
| Medical History: | HIV-positive |
| | Developed multiple cutaneous nodules on his hand and forearm |
| Patient Hobbies: | Maintains a tropical fish aquarium |
| | Because of his current anti-retroviral therapy, the physician does not wish to use a rifampin-containing regimen and asks for susceptibility testing to be performed on this isolate of <i>Mycobacterium marinum</i> . |
