the is collection of information is not necessary for american taxpayers and is simply a make work project. this agency has a notorious history of big spending without making any impact on better health for americans. in fact under the big spending of this agency american health standards have sunk to a new low below many many other countries in the world. we have terribly unhealth people in america now. of course they are carrying around 300 toxic chemicals in their bodies because of the heavy use of toxic chemicals in food and everywhere else. the actions of agencies to correct this is non existent.

Subject: request for copies of an OMB package for comment

Good morning,

I was interested in getting a copy of the OMB package listed below, including a copy of the supporting statement and the instruments for review. Would this be possible? Thank you!
