E. MIGRATORY BIRD SCIENTIFIC COLLECTING
(Migratory Bird Treaty Act, 50 CFR 21.21, 21.23; Eagle Act, 50 CFR 22.21)

Note: A Federal Scientific Collecting Permit is required to capture or collect migratory birds for scientific purposes. Permits are available to scientists and researchers affiliated with scientific or educational institutions, organizations, or agencies. Anyone who will be assisting with the permitted activities must either possess their own Federal permit or have a letter from the permit holder designating them as a subpermittee under that permit. (They may also require a State permit.) The permit holder assumes all liability and responsibility for any activity conducted under the authority of the permit (50 CFR 13.50). A migratory bird permit doesn't authorize trespass on private or publicly managed lands; authorization from land owners or land managers is required to conduct activities on their property, including collection on Federal lands. Specimens collected under a scientific collecting permit must be released or deposited with a public scientific or educational institution upon completion of the study, unless a special purpose permit authorizing possession for a longer period is obtained. Eagle parts must be deposited with the National Eagle Repository. A scientific collecting permit may be valid for up to 3 years. **Please read "What You Should Know About A Migratory Bird Scientific Collecting Permit" and the pertinent regulations before you sign and submit your application.**

USGS Bird Banding Permits: A banding permit issued by the U.S. Geological Survey's Bird Banding Lab is required for all migratory bird banding and marking activities. Banding permits may also authorize blood and feather sampling of birds captured for banding. If you have a banding permit that authorizes these activities, you don't need a scientific collecting permit to conduct these activities; however, any other capture and sampling activities not covered by a banding permit will require a scientific collecting permit.

Protected Species: Only birds listed in the Code of Federal Regulations (50 CFR 10.13) require a Federal migratory bird permit. To view a list of species in the U.S. and their status under the Migratory Bird Treaty Act, go to:
<http://www.fws.gov/migratorybirds/RegulationsPolicies/mbta/mbtintro.html>

You should be as specific as possible in your responses to the questions below. We strongly recommend that you submit your application at least 60 days prior to the date that you need your permit, as required by 50 CFR 13.11(c).
