

required by 10 CFR 51.20(b)(8) to prepare an Environmental Impact Statement (EIS) or a supplement to an EIS for the issuance of a license to possess and use source material for uranium milling. The ISR GEIS and the site-specific SEIS fulfills this regulatory requirement.

2.0 Moore Ranch ISR Facilities

The facilities, if licensed, would include a central processing plant, accompanying wellfields, and ion exchange columns. The milling process involves the dissolution of the water-insoluble uranium from the mineralized host sandstone rock by pumping oxidants (oxygen or hydrogen peroxide) and chemical compounds (sodium bicarbonate) through a series of production and extraction wells. The uranium-rich solution is transferred from the production wells to the central processing plant for uranium concentration using ion exchange columns. Final processing is conducted in the central processing plant to produce yellowcake for use in manufacturing commercial nuclear fuel for use in power reactors.

3.0 Alternatives To Be Evaluated

Alternative 1: The license review process analyzes the Construction, Operation, Aquifer Restoration, and Decommissioning with Disposal via Deep Well Injection (Proposed Action). The proposed federal action is to issue a 10 CFR Part 40 license authorizing the possession and use of source material at the proposed ISR facilities. The NRC staff will analyze the construction, operation, and decommissioning of the proposed ISR facilities, and the restoration of the aquifer from which the uranium would be extracted. The ISR facilities would be located in Campbell County, Wyoming, approximately 50 miles south-southwest of Gillette, Wyoming and approximately 45 miles north-northeast of Casper, Wyoming.

Alternative 2: No Action. The no-action alternative would be not to issue the license. Under this alternative, the NRC would not approve the license application for the proposed ISR facilities. This serves as a baseline for comparison.

Other alternatives not listed here may be identified through the environmental review process.

4.0 Environmental Impact Areas To Be Analyzed

The following areas have been tentatively identified for analysis in the SEIS:

Land Use: Plans, policies, and controls;

Transportation: Transportation modes, routes, quantities, and risk estimates;

Geology and Soils: Physical geography, topography, geology, and soil characteristics;

Water Resources: Surface and groundwater hydrology, water use and quality, and the potential for degradation;

Ecology: Wetlands, aquatic, terrestrial, economically and recreationally important species, and threatened and endangered species;

Air Quality: Meteorological conditions, ambient background, pollutant sources, and the potential for degradation;

Noise: Ambient, sources, and sensitive receptors;

Historical and Cultural Resources: Historical, archaeological, and traditional cultural resources;

Visual and Scenic Resources: Landscape characteristics, manmade features and viewshed;

Socioeconomics: Demography, economic base, labor pool, housing, transportation, utilities, public services/facilities, and education;

Environmental Justice: Potential disproportionately high and adverse impacts to minority and low-income populations;

Public and Occupational Health: Potential public and occupational consequences from construction, routine operation, transportation, and credible accident scenarios (including natural events);

Waste Management: Types of wastes expected to be generated, handled, and stored; and

Cumulative Effects: Impacts from past, present, and reasonably foreseeable actions at and near the site(s).

This list is not intended to be all inclusive, nor is it a predetermination of potential environmental impacts.

5.0 The NEPA Process

The SEIS for the Moore Ranch ISR Project will be prepared pursuant to the NRC's NEPA Regulations at 10 CFR Part 51. The NRC and its contractor will prepare and publish a draft SEIS for comment. NRC currently plans to have a 45-day public comment period for the draft SEIS. Availability of the draft SEIS and the dates of the public comment period will be announced in the **Federal Register** and the NRC Web site: <http://www.nrc.gov>. The final SEIS will include responses to public comments received on the draft SEIS.

Dated at Rockville, Maryland, this 12th day of August 2009.

For the Nuclear Regulatory Commission.

OFFICE OF PERSONNEL MANAGEMENT

[OMB Control No. 3206-0219]

Request for Comments on a Reinstatement With Change of an Existing Information Collection

AGENCY: U.S. Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, May 22, 1995), this notice announces that the U.S. Office of Personnel Management (OPM) intends to submit to the Office of Management and Budget (OMB) a request for review of an existing information collection. This information collection occurs electronically via the *USAJOBS Resume Builder* (online application) or completion and submission via regular mail, e-mail, fax, or in person of *OF 612 Optional Form Application for Federal Employment* or a resume. The *USAJOBS Resume Builder* and the *OF 612* both reflect the minimal critical elements collected across the Federal government to assess an applicant's qualifications for Federal jobs under the authority of sections 1104, 1302, 3301, 3304, 3320, 3361 3393, and 3394 of Title 5 United States Code.

This notice also announces that the Office of Personnel Management (OPM) intends to continue using the *Optional Form Application for Federal Employment (OF 612)* and will not be requesting cancellation from the Office of Management and Budget at this time.

The information collection was previously published in the **Federal Register** on February 25, 2009, at 73 FR 8589 allowing for a 60-day public comment period. We have received two comments on the 60-day Notice requesting that the OF-612 be continued.

The purpose of this notice is to allow an additional 30 days for public comments. Comments are particularly invited on: Whether this information is necessary for the proper performance of functions of OPM, and whether it will have practical utility; whether our

estimate of the public burden of this collection of information is accurate and based on valid assumptions and methodology; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

We estimate 50,125,000 applications will be completed annually using the *OF 612* and the *USAJOBS Resume Builder*. Each takes approximately 40 minutes to read and complete, depending on the amount of information the applicant wishes to include. The annual estimated burden is 33,416,667 hours.

DATES: Comments on this proposal should be received within 30 calendar days from the date of this publication.

ADDRESSES: Send or deliver comments to: OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, 725 17th Street, NW., Room 10236, Washington, DC 20503.

Please provide your mailing address or Fax number with your request.
