Subject: Non-Substantive Change Request for *Web Based Training for Pain Management Providers (NIDA)*, Expiration Date: 8/31/2012

OMB Control Number: 0925-0621

Request Date: November 4, 2010

*A non-substantive change* is needed in the assessment instrument for our research *Web Based Training for Pain Management Providers (NIDA)*. We request permission to change a number of questions. The changes correct typos and other errors, improve question clarity and quality, and replace language that has changed in the field since the questions were first written. We limited the changes to words and made no change in the number of questions or length of the questions and thus there is no change in the impact on the research subject.

I am re-sending the copies of the complete application. Please note that only Attachment 5 has changed.
