National Survey of Early Care and Education

National Survey of Early Care & Education

If you have any questions, please call 1-877-XXX-XXXX

The U.S. Department of Health and Human Services (DHHS) is conducting an important study to learn about how many people are looking after children who are not their own—such as the children of family members, friends, neighbors, or others—in their home or in someone else’s home. This information is crucial because it will help DHHS to understand the availability and use of early care and education for young children in your community. This information will help inform state and federal agencies in their efforts to improve access to quality child care for all children. Please have an adult (18 years or older) who lives in this household answer the following questions. We are required by the Federal Privacy Act to develop and follow strict procedures to protect your information and use your answers only for research. If you have any questions or would prefer to answer these questions by phone, please call NORC toll-free at 1-877-XXX-XXXX.
