SUPPORTING STATEMENT

Operator Response to Schedule for Submission of Additional Evidence and Operator Response to Notice of Claim OMB NO. 1240-0033 (Formerly 1215-0058)

A. Justification.

1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collections. Attach a copy of the appropriate section of each statute and of each regulation mandating or authorizing the collection of information.

The Office of Workers' Compensation Programs (OWCP) administers the Black Lung Benefits Act (BLBA), 30 USC 901 *et. seq.* The statute provides for the payment of benefits to eligible coal miners and survivors by last coal mine operator for whom the miner had worked at least one year, or by the Black Lung Disability Trust Fund in the event no responsible coal mine operator can be identified. The forms approved by OMB under this collection are:

CM-2970 - This form is required by 20 CFR 725.412, and is used by the District Director to define and narrow issues regarding the coal mine operator's liability and the claimant's eligibility for benefits.

CM-2970a -- When DCMWC receives an application for benefits, that applicant is considered potentially eligible for Black Lung benefits until the claim adjudication processes is complete and a proposed decision is issued. This form is used by the District Director to assess the acceptance or denial of potential liability for payment of benefits of coal operators and their insurers.

2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.

CM-2970 -- The coal mine operator returns this form to controvert their liability and the claimant's entitlement to benefits. The form states the issues the operator is contesting. The claims examiner (CE) acknowledges receipt of the form and establishes with the operator a deadline for submission of evidence to support the disagreement. Failure of the operator to respond to the CM-2970 is deemed an acceptance of the liability. The information collected on this form is used by the District Director to determine whether or not the coal mine operator agrees with the District Director's assessment of the operator's liability for payment of benefits and the claimant's eligibility for benefits.

Once the Agency issues a proposed decision and order approving eligibility or the claimant disagrees with a decision denying eligibility, The Schedule for Submission of Additional Evidence (CM-2970), which names the responsible operator, is sent to the coal mine operator(s)

to give them the opportunity to agree with or to controvert liability. To disagree with liability and/or the claimant's entitlement to black lung benefits, the responsible operator must respond within thirty days of receipt. 30 USC 901 *et. seq.* and 20 CFR 725.412 govern this response for claims filed after January 19, 2001.

CM-2970a -- For Claims filed after January 19, 2001, the CM-2970a will be sent to all potential responsible coal mine operators. The CE sends the CM-2970a to the operator with the notice of claim. The returned CM-2970a is used as the operator's notification to DCMWC of the acceptance or controversion of potential liability. If the operator controverts liability, the CE is alerted to examine more closely that aspect of claims development. As a result, it is possible for a different operator to be identified as potentially responsible prior to the determination of eligibility. If the operator does not controvert within 30 days of notification, the potential responsible operator will not be allowed to contest liability for the specific reasons set forth on this form. The information collected on this form is used by the District Director to determine the coal mine operator's response to being named potentially liable for the payment of benefits.

If a coal mine operator has been identified as potentially liable for payment of those benefits, the responsible operator is sent notification of that claim. The CM-2970a, sent with that notification, gives the operator an opportunity to controvert their liability and the applicant's eligibility. The operator must return the completed form within 30 days of receipt contesting liability, or he will not be allowed to contest possible liability for the reasons set forth on this form as the responsible operator. The CM-2970a may also be sent to a potentially liable operator when a claimant disagrees with a potential denial and that claim has been appealed. 30 USC 901 et. seq. and 20 CFR 725.407 & .408 necessitate the notification to the operator and contain the statutory and regulatory requirements for the identification and notification of the coal mine operator for claims filed after January 19, 2001.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also describe any consideration of using information technology to reduce burden.

In accordance with the Government Paperwork Elimination Act, the CM-2970 and CM-2970a are interactive and are available on the Internet for downloading or electronic submission at http://www.dol.gov/owcp/regs/compliance/cm-2970.pdf and http://www.dol.gov/owcp/regs/compliance/cm-2970a.pdf. These links are highlighted on the DCMWC web site. To date, no forms have been electronically submitted.

4. Describe efforts to identify duplication. show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above.

Since the information requested on each of these forms specifically relates to the Black Lung Program, no other OWCP Programs or Federal agency has similar requirements.

5. If the collection information impacts small businesses or other small entities (Item 5 of 014B Form 83-1), describe any methods used to minimize burden.

Some of the identified coal companies are considered small businesses. The use of a concise form helps the company identify the reason(s) for controversion and minimizes the burden of response. This information collection does not have a significant economic impact on a substantial number of small entities.

6. Describe the consequence of Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.

This information is requested only once, at the time prescribed in the regulations. If it were not collected, the coal mine operators would not be afforded due process.

- 7. Explain any special circumstance that would cause an information collection to be conducted in a manner:
 - requiring respondents to report information to the agency more often than quarterly;
 - requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;
 - requiring respondents to submit more than an original and two copies of any document;
 - requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records for more than three years;
 - in connection with a statistical survey that is not designed to produce valid and reliable results that can be generalized to the universe of study;
 - requiring the use of statistical data classification that has not been reviewed and approved by OMB;
 - that includes a pledge of confidentially that is not supported by authority
 established in statue or regulation that is not supported by disclosure and data
 security policies that are consistent with the pledge, or which unnecessarily
 impedes sharing of data with other agencies for compatible confidential use; or
 - requiring respondents to submit proprietary trade secret, or other confidential
 information unless the agency can prove that it has instituted procedures to
 protect the information's confidentially to the extent permitted by law.

There are no special circumstances for this information collection.

8. If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the agency's notice, required by 5 CFR 1320.8 (d), soliciting comments on the information collection prior to submission to OMB. Summarize public comments received in response to that notice and describe actions taken by the agency in response to these comments.

Coal mine operators and their associations have not indicated any problems with the use of the CM-2970 and CM-2970a.

A Federal Register Notice inviting public comment was published on August 20, 2010. No comments were received.

9. Explain any decision to provide any payment or gift to respondents, other than remuneration of contractors or grantees.

Respondents do not receive gifts or payments to furnish the requested information.

10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulations, or agency policy.

The attached Privacy Act System notices (ESA-6 & ESA-30) provide confidentiality of information collection involving Black Lung claimant files and computerized data.

11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private. This justification should include the reasons why the agency considers the questions necessary; the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.

No questions of a sensitive nature appear on these forms.

12. Provide estimates of the hour burden of the collection of information. The statement should:

Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. Unless directed to do so, agencies should not make special surveys to obtain information on which to base burden estimates. Consultation with a sample of potential respondents is desirable. If the burden on respondents is expected to vary widely because of differences in activity, size, or complexity, show the range of estimated burden and explain the reason for the variance. Generally, estimates should not include burden hours for customary and usual business practices. Provide estimates of the hour burden of the collection of information. The statement should:

• Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. Unless directed to do so, agencies should not make special surveys to obtain information on which to base burden estimates. Consultation with a sample of potential respondents is desirable. If the burden on respondents is expected to vary widely because of differences in activity,

size, or complexity, show the range of estimated burden and explain the reason for the variance. Generally, estimates should not include burden hours for customary and usual business practices.

The estimated total burden to the coal mine operators is 2000 hours. It takes about 10 minutes to complete and mail the 4,800 CM-2970 forms and 15 minutes to complete and mail each of the 4,800 CM-2970a. The operators typically have the needed information readily available in their computer systems.

<u>Form</u>	<u>Number</u>	Minutes Each	<u>Total Hours</u>
CM-2970	4800	10	0800
CM-2970a	4800	15	1200

The estimated annualized cost to the respondents is \$14.62 per hour. This hourly wage is from the Bureau of Labor Statistics, National Occupational Employment and Wage Estimates, under the heading Office and Administrative Support Occupations (http://www.bls.gov/oes/current/oes_nat.htm#b43-0000). The estimated annualized cost to respondents to provide this information is approximately \$29,240.

13. Annual Costs to Respondents (capital/start-up & operation and maintenance).

The operation and maintenance cost are 44¢ for postage and 3¢ for envelope which will be 47¢ (47¢ x 9,600 responses = \$4,512.00)

14. Provide estimates of annualized cost to the Federal government.

The estimated cost to the Federal Government for these 9,600 forms is approximately \$30,128.00. The cost is figured as follows:

a.	Estimated printing cost:	\$ 200.00
	4,800 CM-2970 4,800 CM-2970a	100.00 100.00
b.	Estimated mailing cost: (44¢ plus 3¢ per envelope for a total of 47¢ per form)	\$4,512.00
e.	Estimated processing cost: \$25,416.00 [one CE GS-12/4 spends about 5 minutes (12 forms per hour) evaluating each form $$31.77 \times 9,600/12 = $25,416$]	

(This hourly salary is taken from the <u>FY 2010 Salary Table–GS</u>.)

15. Explain the reasons for any program changes or adjustments reported in Items 13 or 14 of the OMB Form 83-I.

The estimated operating cost has risen slightly because of an increase in postage from 41¢ to 44¢ from the previous clearance. The estimated total number of forms has been adjusted upward by 20% because of an increase in claim filings.

16. For collections of information whose results will be published, outline plans for tabulation and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection information, completion of report, publication dates, and other actions.

There are no plans to publish this information.

17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.

This ICR does not seek a waiver from the requirement to display the expiration date.

18. Explain each exception to the certification statement identified in Item "Certification for Paperwork Reduction Act Submissions," of OMB Form 83-I.

There are no exceptions to the certification statement.
