About E-Verify Self Check

The E-Verify Self Check service is a web-based application that can be used by any U.S. based worker over the age of 16 to confirm his or her employment eligibility. After the user enters a small amount of information, the Self Check service will check that information against various government databases to determine the user's work eligibility in the United States.

Background
Self Check was developed in response to a request by Congress to create a service through which U.S. workers could check their own employment eligibility status outside of the employer focused E-Verify process. It is the first service offered directly to the U.S. workforce by the E-Verify program.

Benefits of Self Check
The E-Verify Self Check service will bring a number of benefits to both U.S. workers and businesses.

Self Check will give U.S. workers access to their employment eligibility status and take the mystery out of the employment eligibility confirmation process. In addition, employees will have powerful knowledge to fight employment eligibility related workplace discrimination.

For businesses, the employer-focused E-Verify process will be streamlined and shortened by a reduction in the number of data mismatches and, as a result, a decrease in amount of time employers and employees spend resolving those mismatches...[content continues]

How to Use E-Verify Self Check A

Once you have decided to use the E-Verify Self Check service there are four steps to completing the process. The steps are shown in the following graphic and explained below. B

ESTABLISH IDENTITY		CONFIRM WORK ELIGIBILITY	
1 ENTER ID DATA	2 TAKE A QUIZ	3 ENTER DOCUMENT DATA	4 GET RESULTS
			

Steps one and two maintain your privacy by checking with a non-government identity proofing service to ensure that no one but you can check your government employment eligibility records. In steps three and four your information will be checked against U.S. government databases to determine your employment eligibility. D

Step 1 - Enter ID Data
 You will be asked to enter some basic identifying information such as your name, address, date of birth, and Social Security number. Providing your Social Security number is optional in Step 1. If you choose to not provide here, you will be required to do so in Step 3 before we check your employment eligibility status...[content continues]

Help - Social Security Number (SSN)

The identifying information required by E-Verify Self Check is used to create a short quiz to authenticate your identity. This quiz is designed to prevent someone else from checking your status.

Providing your Social Security number is not required for the quiz, however it may help create questions that only you are able to answer.

Once you finish the quiz, your Social Security number will be required to check your employment eligibility status.
