

Pulp and Paper Emission Unit List vs SCC's

This tab contains the pulp and paper process equipment SCCs preferred for use in the pulp and paper sector survey response. Additional SCCs (including those for boilers) can be found in the "All 11575 SCC" tab. The SCCs are organized by pulp and paper process/equipment groupings. Use the SCC that best describes your process, and avoid use of generic not-elsewhere-classified SCCs whenever possible.

This spreadsheet contains codes you will refer to when completing the NEI update portion of your pulp and paper sector survey response. Within this spreadsheet you will find two gray tabs that contain SCC codes; and several pink tabs which contain codes used in EPA's NEI data base. Code lists for some NEI fields (Facility Category Code, Emission Release Point Type, Emission Calculation Method Code, and HAP Emissions Performance Level) were short enough to include in the "instruction" row of the survey spreadsheet and are not repeated in this spreadsheet.

Source of NEI codes: <http://www.epa.gov/ttn/chief/eiinformation.html> (Extracted in January 2010 from data base appendix_6.mdb under *EIS Code Tables (including SCCs)*)

Control Measure Codes

DO NOT USE green shaded rows for emission unit additions to your NEI data because these SCCs are being phased out as indicated in the "Last Inventory Year" column. If is OK to leave green-shaded codes in your existing NEI data if the codes are already there (but please do not assign the outdated codes to new emi:
