General Description of Reports

This information collection is mandatory for banks¹ using the Advanced Capital Adequacy Framework: 12 U.S.C. 161 (for national banks), 12 U.S.C. 324 and 12 U.S.C. 1844(c) (for State member banks and BHCs respectively), 12 U.S.C. 1817 (for insured State nonmember commercial and savings banks), and 12 U.S.C. 1464 (for savings associations). This information collection will be given confidential treatment (5 U.S.C. 552(b)(4)) except for selected data items (Schedules A and B, and data items 1 and 2 of the operational risk Schedule S) that will be released for reporting periods after an institution has successfully completed its parallel run period and is qualified to use the advanced approaches for regulatory capital purposes. The agencies will not publicly release information submitted during an entity's parallel run period.

Abstract

Each bank that qualifies for and applies the advanced internal ratings-based approach to calculate regulatory credit risk capital and the advanced measurement approaches to calculate regulatory operational risk capital, as

¹ For simplicity, and unless otherwise indicated, this notice uses the term "bank" to include banks, savings associations, and bank holding companies (BHCs). The terms "bank holding company" and "BHC" refer only to bank holding companies regulated by the Board and do not include savings and loan holding companies regulated by the OTS. For a detailed description of the institutions covered by this notice, refer to Part I, Section 1, of the final rule entitled Risk-Based Capital Standards: Advanced Capital Adequacy Framework (72 FR 69397, December 7, 2007).

described in the final rule implementing the Advanced Capital Adequacy Framework (72 FR 69288, December 7, 2007, referred to hereafter as the final rule), is required to file quarterly regulatory data. The agencies use these data to assess and monitor the levels and components of each reporting entity's risk-based capital requirements and the adequacy of the entity's capital under the Advanced Capital Adequacy Framework; to evaluate the impact and competitive implications of the Advanced Capital Adequacy Framework on individual reporting entities and on an industry-wide basis; as one input to develop an interagency study at the end of the second transitional floor period (as described more fully in the final rule); and to supplement on-site examination processes. The reporting schedules also assist banks in understanding expectations around the system development necessary for implementation and validation of the Advanced Capital Adequacy Framework. Submitted data that are released publicly following a reporting entity's parallel run period will also provide other interested parties with information about banks' risk-based capital.

Current Actions

The agencies propose to revise certain portions of the FFIEC 101 report beginning with the March 31, 2011, report date. These proposed changes are described below.

Reporting of information about the numerator of a bank holding company's risk-based capital ratios. For bank holding companies subject to these reporting requirements, the agencies propose to recaption line item 6.b of Schedule A, Part 1 of the FFIEC 101 report and to add line item 6.c. Line item 6.b is currently intended to capture two components of capital that are reported separately on Schedule HC-R of the FR Y-9C:² the amount of qualifying restricted core capital elements (other than cumulative perpetual preferred stock) held by bank holding companies (as reported in item 6.b of Schedule HC-R) and qualifying mandatory convertible preferred securities held by internationally active bank holding companies (as reported in item 6.c of Schedule HC-R). The agencies propose to align the reporting of these capital elements to that of Schedule HC-R of the FR Y-9C by separately including both capital elements in the FFIEC 101. These two capital elements would replace the

current item 6.b and would appear, as they do on Schedule HC-R in the FR Y-9C, as items 6.b and 6.c of Schedule A, Part 1, respectively. Reporting instructions for the FFIEC 101 would be revised accordingly. The change in reporting would apply only to bank holding companies.

Reporting of information about the numerator of a savings association's risk-based capital ratios. For the purposes of simplicity and comparability of reporting financial information among banks and savings associations under the Advanced Capital Adequacy Framework, the Agencies propose to delete Part 2 of Schedule A for savings associations. Instead, all banks, bank holding companies, and savings associations reporting under the Advanced Capital Adequacy Framework would report on the same Schedule A form (see <http://www.ffiec.gov/forms101.htm>). Reporting instructions for the FFIEC 101 would be revised accordingly.

Reporting of information on equity exposures. Banks subject to these reporting requirements currently provide information about equity exposure amounts and the risk-weighted asset amount of these exposures in Schedule R of the FFIEC 101. This schedule currently contains 22 line items (exposure categories, subtotals, and totals) and two columns (exposure and risk-weighted asset amounts) in which data are reported. A number of the line items listed on the schedule only apply to certain approaches contained within the final rule for calculating risk-weighted asset amounts for equity exposures. The agencies propose to reformat Schedule R to clarify what line items need to be reported based on which of the three approaches the bank uses to calculate risk-weighted asset amounts for its equity exposures: the simple risk weight approach (SRWA), the full internal models approach (full IMA), or the IMA applied to only publicly traded equity exposures (publicly traded or partial IMA).

The reformatted version of Schedule R does not alter any of the existing line items in the current schedule. More specifically, neither the exposure categories nor the number of equity exposure items completed by banks using a given approach would change as a result of this proposal. Rather, the proposal is to expand the number of columns shown on the schedule from two to six to allow for reporting of a distinct set of exposure and risk-weighted asset information for banks using the SRWA, a distinct set of exposure and risk-weighted asset

information for banks using the full IMA, and a distinct set of exposure and risk-weighted asset information for banks using the partial IMA. Each set of exposure and risk-weighted asset columns would appear with the heading of the applicable final rule approach used by the bank and only those exposure categories (including subtotals and totals) applicable to a given approach would appear within each columnar section of the reformatted schedule (see <http://www.ffiec.gov/forms101.htm>). Reporting instructions for the FFIEC 101 would be revised accordingly.
