**Survey of former applicants to the
National Science Foundation's
International Research Fellowship Program (IRFP)**

Welcome and thank for your interest in this study. This survey is being conducted by Abt Associates Inc., and our subsidiary, AbtSRBI, for the National Science Foundation (NSF), to learn about the experiences, career choices, and professional activities of individuals who applied to NSF's International Research Fellowship Program (IRFP). You are receiving this survey because you are listed in the IRFP database as an applicant to IRFP.

Confidentiality and Participation

Participation in the survey is voluntary and nonparticipation will have no impact on you or your institution. You may skip questions on the survey or discontinue participation at any time. There are minimal risks associated with your participation. We take your privacy very seriously. Your responses to this survey will be protected under the Privacy Act. There is minimal risk of breach of confidentiality, and we have put in place procedures to minimize this risk. Reports will never identify you by name, and information from the study will only be reported in the aggregate at the program level, combined with about 250 other responses. When we receive your survey we will detach and store separately your name and other identifying information that could be used to link you to your survey responses. Survey responses will be stored on a secure drive that is only accessible to members on the study team. Only study team web technicians and data analysts from Abt Associates and AbtSRBI will see individual responses that can be linked to you. Survey data files will be shared with NSF at the end of the study, only after study team members have examined the data to be free of any information that could help identify you; this cleaning includes procedures to limit someone from inferring your identity by analyzing non-identifying data. Hence, we encourage you to respond candidly about your experiences. Separate from your individual responses to the survey we will provide NSF any updated contact information we have found or requested from you. None of this contact information will be linked in any way to your survey responses. At the conclusion of the study, Abt Associates and AbtSRBI will destroy all records, electronic or otherwise, that link you to your survey responses.

This study's IRB approval number is #0494, valid from 8/6/2010 to 8/5/2011. For questions, please contact Teresa Doksum, IRB Administrator, Abt Associates, at IRB@abtassoc.com.

The valid OMB control no. for this information collection is xx-xxxxx. (Expires on mm/dd/yyyy)

What is the International Research Fellowship Program (IRFP)?

The International Research Fellowship Program (IRFP) is a National Science Foundation (NSF) program that provides support for new doctoral-level scientists and engineers to conduct research in a foreign country for a period of 3 to 24 months.

Why are you doing this study?

NSF is interested in learning about the characteristics of scientists and engineers who applied for an IRFP Fellowship between 1992 and 2009. Information about the domestic and international experiences of IRFP participants and non-participants will help NSF understand the usefulness and relevance of international research training for scientists and engineers. Information from this study will be used to describe the experiences and career paths of new Ph.D. scientists and engineers who expressed interest in pursuing an international collaboration.

Why have I been selected to participate in this survey?

You have been selected to participate because we have identified you as having applied to the International Research Fellowship Program (IRFP).

How did you get my contact information?

We identified you from records maintained by the National Science Foundation on prior IRFP applicants. We then obtained your contact information through an internet search.

How long will this survey take to complete?

We estimate that the survey will take about 30 minutes.

How will you use my comments?

Responses from all survey respondents will be used to answer questions about IRFP applicants' early career trajectories, the nature of their research collaborations both within and outside of the U.S., and their subsequent career paths.

Has this study been reviewed and approved by an institutional review board?

Yes, the study was also approved by Abt Associates' Institutional Review Board. If you have any concerns about your participation in this survey, please contact Teresa Doksum, Institutional Review Board Administrator at Abt Associates, at (877) 520-6835 or via email at irb@abtassoc.com.

Who is funding the study?

The study has been funded by the National Science Foundation under contract GS-10F-0086K. Abt Associates and AbtSRBI will complete the study.

Who are Abt Associates Inc and AbtSRBI?

Abt Associates is an independent research firm headquartered in Cambridge, Massachusetts. AbtSRBI is a wholly-owned subsidiary of Abt Associates specializing in large-scale data collection and public opinion research. NSF has contracted with Abt Associates and AbtSRBI to design and implement a survey of individuals who applied to NSF's International Research Fellowship Program (IRFP).

Welcome and thank for your interest in this study. This survey is being conducted by Abt Associates Inc. and our subsidiary, AbtSRBI, for the National Science Foundation (NSF), to learn about the graduate experiences, career choices, and professional activities of individuals who applied to NSF's East Asia and Pacific Summer Institutes (EAPSI) program. You are receiving this survey because you are listed in the NSF database as an applicant to EAPSI.

NSF's records indicate that you applied for a summer graduate research fellowship in one of the following sites between 1999 and 2010:

Japan	Australia
Korea	New Zealand
Taiwan	Singapore
China	

These graduate summer fellowships are part of NSF's East Asia and Pacific Summer Institutes program (EAPSI). If you do not recall applying to this program, please click here:

There are minimal risks associated with your participation. We take your privacy very seriously. Your responses to this survey will be protected under the Privacy Act. There is minimal risk of breach of confidentiality, and we have put in place procedures to minimize this risk. Reports will never identify you by name, and information from the study will only be reported in the aggregate at the program level, combined with about 500 other responses. When we receive your survey we will detach and store separately your name and other identifying information that could be used to link you to your survey responses. Survey responses will be stored on a secure drive that is only accessible to members on the study team. Only study team web technicians and data analysts from Abt Associates and AbtSRBI will see individual responses that can be linked to you. Survey data files will be shared with NSF at the end of the study, only after study team members have examined the data to be free of any information that could help identify you; this cleaning includes procedures to limit someone from inferring your identity by analyzing non-identifying data. Hence, we encourage you to respond candidly about your experiences. Separate from your individual responses to the survey we will provide NSF any updated contact information we have found or requested from you. None of this contact information will be linked in any way to your survey responses. At the conclusion of the study, Abt Associates and AbtSRBI will destroy all records, electronic or otherwise, that link you to your survey responses.

Completing the Survey

We estimate that it will take approximately 30 minutes to complete the survey. What is the East Asia and Pacific Summer Institute (EAPSI) Program?

The East Asia and Pacific Summer Institute (EAPSI) Program is a National Science Foundation (NSF) program that provides funding for U.S. graduate students to spend eight to ten weeks collaborating with a host researcher in one of seven sites in the East Asia and Pacific region: Australia, China, Japan, Korea, New Zealand, Singapore, and Taiwan.

Why are you doing this study?

NSF is interested in learning about the characteristics of current and former graduate students who applied to participate in the EAPSI program sometime between 1999 to 2009. Information about the domestic and international experiences of EAPSI participants and non-participants will help NSF understand the usefulness and relevance of international research training for scientists and engineers. Information from this study will be used to describe the characteristics and subsequent career paths of graduate students who expressed interest in pursuing an international collaboration.

Why have I been selected to participate in this survey?

You have been selected to participate because we have identified you as having applied to the EAPSI program while you were a graduate student.

How did you get my contact information?

We identified you from records maintained by the National Science Foundation on prior EAPSI applicants. We then obtained your contact information through an internet search.

How long will this survey take to complete?

We estimate that the survey will take about 30 minutes.

How will you use my comments?

Responses from all survey respondents will be used to answer questions about the graduate training, international experience, and career paths of applicants to the EAPSI program between 1999 and 2009.

Has this study been reviewed and approved by an institutional review board?

Yes, the study was approved by Abt Associates' Institutional Review Board. If you have any concerns about your participation in this survey, please contact Teresa Doksum, Institutional Review Board Administrator at Abt Associates, at (877) 520-6835 or via email at irb@abtassoc.com.

Who is funding the study?

The study has been funded by the National Science Foundation under contract GS-10F-0086K. Abt Associates and AbtSRBI will complete the study.

Who are Abt Associates Inc and AbtSRBI?

National Science Foundation

IRFP Host Survey

This survey is being conducted by Abt Associates Inc. and our subsidiary, AbtSRBI, for the National Science Foundation (NSF), to learn about the graduate experiences, career choices, and professional activities of individuals who participated in NSF's International Research Fellowship Program (IRFP). You are receiving this survey because you are listed in the IRFP database as a host of an IRFP fellow.

Confidentiality and Participation

Participation in the survey is voluntary and nonparticipation will have no impact on you or your institution. You may skip questions on the survey or discontinue participation at any time. There are minimal risks associated with your participation. We take your privacy very seriously. Your responses to this survey will be protected under the U.S. Privacy Act. There is minimal risk of breach of confidentiality, and we have put in place procedures to minimize this risk. Reports will never identify you by name, and information from the study will only be reported in the aggregate at the program level, combined with about 250 other responses. When we receive your survey we will detach and store separately your name and other identifying information that could be used to link you to your survey responses. Survey responses will be stored on a secure drive that is only accessible to members on the study team. Only study team web technicians and data analysts from Abt Associates and AbtSRBI will see individual responses that can be linked to you. Survey data files will be shared with NSF at the end of the study, only after study team members have examined the data to be free of any information that could help identify you; this cleaning includes procedures to prevent someone from inferring your identity by analyzing non-identifying data. Hence, we encourage you to respond candidly about your experiences. Separate from your individual responses to the survey we will provide NSF any updated contact information we have found or requested from you. None of this contact information will be linked in any way to your survey responses. At the conclusion of the study, Abt Associates and AbtSRBI will destroy all records, electronic or otherwise, that link you to your survey responses.

Completing the Survey

We estimate that it will take approximately 15 minutes to complete the survey. If you have questions about the study, please contact the study director, Alina Martinez of Abt Associates Inc. at (866) 421-6223 (may incur international telephone charges if initiated outside the U.S) or email her at IRFP_survey@abtassoc.com. You may also contact the evaluation's program officer at NSF, John Tsapogas (jtsapoga@nsf.gov). If you have questions about your rights as a research participant, you may contact Teresa Doksum, the Abt Institutional Review Board Administrator at (877) 520-6835 6835 (may incur international telephone charges if initiated outside the U.S) or by email: irb@abtassoc.com.

What is the International Research Fellowship Program (IRFP)?

The International Research Fellowship Program (IRFP) is a National Science Foundation (NSF) program that provides support for new doctoral-level scientists and engineers to conduct research in a foreign country for a period of 9 to 24 months.

Why are you doing this study?

NSF is interested in learning about the experiences of researchers who have hosted one or more IRFP fellows from the United States as part of the IRFP program. In particular, NSF would like to understand how host researchers perceive the program and the students they have hosted, and what kinds of benefits and challenges host researchers experienced. The information collected in the study will help NSF make improvements to the program, and understand how best to support and encourage international collaboration.

Why have I been selected to participate in this survey?

You have been selected to participate because we have identified you as having hosted one or more U.S. fellows participating in the IRFP program.

How did you get my contact information?

We identified you from records maintained by the National Science Foundation on IRFP participants and the scientists who hosted them. We then confirmed your contact information through an internet search.

How long will this survey take to complete?

We estimate that the survey will take about 15 minutes.

How will you use my comments?

Responses from all survey respondents will be used to answer questions about the experiences of IRFP host researchers with the program and with the guest fellows.

Has this study been reviewed and approved by an institutional review board?

Yes, the study was also approved by Abt Associates' Institutional Review Board. If you have any concerns about your participation in this survey, please contact Teresa Doksum, Institutional Review Board Administrator at Abt Associates, at (877) 520-6835 or via email at irb@abtassoc.com.

Who is funding the study?

The study has been funded by the National Science Foundation under contract GS-10F-0086K. Abt Associates and AbtSRBI will complete the study.

Who are Abt Associates Inc and AbtSRBI?

Abt Associates is an independent research firm headquartered in Cambridge, Massachusetts. AbtSRBI is a wholly-owned subsidiary of Abt Associates specializing in large-scale data collection and public opinion research. NSF has contracted with Abt Associates and AbtSRBI to design and implement a survey of individuals who applied to NSF's International Research Fellowship Program (IRFP).

EAPSI Host Survey

This survey is being conducted by Abt Associates Inc. and our subsidiary, AbtSRBI, for the National Science Foundation (NSF), to learn about the graduate experiences, career choices, and professional activities of individuals who participated in NSF's East Asia and Pacific Summer Institutes (EAPSI) program. You are receiving this survey because you are listed in the EAPSI database as a host of an EAPSI fellow.

Confidentiality and Participation

Participation in the survey is voluntary and nonparticipation will have no impact on you or your institution. You may skip questions on the survey or discontinue participation at any time. There are minimal risks associated with your participation. We take your privacy very seriously. Your responses to this survey will be protected under the U.S. Privacy Act. There is minimal risk of breach of confidentiality, and we have put in place procedures to minimize this risk. Reports will never identify you by name, and information from the study will only be reported in the aggregate at the program level, combined with about 500 other responses. When we receive your survey we will detach and store separately your name and other identifying information that could be used to link you to your survey responses. Survey responses will be stored on a secure drive that is only accessible to members on the study team. Only study team web technicians and data analysts from Abt Associates and AbtSRBI will see individual responses that can be linked to you. Survey data files will be shared with NSF at the end of the study, only after study team members have examined the data to be free of any information that could help identify you; this cleaning includes procedures to prevent someone from inferring your identity by analyzing non-identifying data. Hence, we encourage you to respond candidly about your experiences. Separate from your individual responses to the survey we will provide NSF any updated contact information we have found or requested from you. None of this contact information will be linked in any way to your survey responses. At the conclusion of the study, Abt Associates and AbtSRBI will destroy all records, electronic or otherwise, that link you to your survey responses.

What is the East Asia and Pacific Summer Institute (EAPSI) Program?

The East Asia and Pacific Summer Institute (EAPSI) Program is a program in which the National Science Foundation (NSF) and its partners organizations in Australia, China, Japan, Korea, New Zealand, Singapore, and Taiwan cooperate to provide U.S. graduate students an opportunity to spend eight to ten weeks collaborating with a host researcher at a university or research institute in one of these locations. The program matches accomplished researchers in the host location with promising U.S. graduate students to foster international collaboration.

Why are you doing this study?

NSF is interested in learning about the experiences of researchers who have hosted one or more graduate students from the United States as part of the EAPSI program. In particular, NSF would like to understand how host researchers perceive the program and the students they have hosted, and what kinds of benefits and challenges host researchers experienced. The information collected in the study will help NSF make improvements to the program, and understand how best to support and encourage international collaboration.

Why have I been selected to participate in this survey?

You have been selected to participate because we have identified you as having hosted one or more U.S. graduate students participating in the EAPSI program.

How did you get my contact information?

We identified you from records maintained by the National Science Foundation on EAPSI participants and the scientists who hosted them. We then confirmed your contact information through an internet search.

How long will this survey take to complete?

We estimate that the survey will take about 15 minutes.

How will you use my comments?

Responses from all survey respondents will be used to answer questions about the experiences of EAPSI host researchers with the program and with the guest students.

What happens if I don't answer this survey?

Participation in the survey is voluntary. Abt Associates will not share information with the National Science Foundation or its partner agencies in your location about your decision to participate or not to participate.

Has this study been reviewed and approved by an institutional review board?

Yes, the study was also approved by Abt Associates' Institutional Review Board. If you have any concerns about your participation in this survey, please contact Teresa Doksum, Institutional Review Board Administrator at Abt Associates, at (877) 520-6835 or via email at irb@abtassoc.com. A call to this number may incur international charges.

Who is funding the study?

The study has been funded by the National Science Foundation under contract GS-10F-0086K. Abt Associates and AbtSRBI will complete the study.

Who are Abt Associates Inc and AbtSRBI?

Abt Associates is an independent research firm headquartered in Cambridge, Massachusetts. AbtSRBI is a wholly-owned subsidiary of Abt Associates specializing in large-scale data collection and public opinion research. NSF has contracted with Abt Associates and AbtSRBI to design and implement a survey of researchers who hosted a U.S. graduate student participating in NSF's EAPSI program.

What is the East Asia and Pacific Summer Institute (EAPSI) Program?

The East Asia and Pacific Summer Institute (EAPSI) Program is a National Science Foundation (NSF) program that provides funding for U.S. graduate students to spend eight to ten weeks collaborating with a host researcher in one of seven locations in the East Asia and Pacific region: Australia, China, Japan, Korea, New Zealand, Singapore, and Taiwan.

Why are you doing this study?

NSF is interested in learning about the characteristics of current and former graduate students who participated in the EAPSI program between 1999 and 2009. NSF is particularly interested in how the graduate advisors of EAPSI Fellows' view the program and its benefits (or costs) to graduate students' subsequent educational and career paths. This information will help NSF understand the usefulness and relevance of international research training for scientists and engineers.

Why have I been selected to participate in this survey?

You have been selected to participate because we have identified you as having served as graduate advisor to a former EAPSI fellow.

How did you get my contact information?

We identified you from records maintained by the National Science Foundation on prior EAPSI Fellows' applications. We then obtained your contact information through an internet search.

How long will this survey take to complete?

We estimate that the survey will take about 15 minutes.

How will you use my comments?

Responses from all survey respondents will be used to answer questions about the graduate training, international experiences, and career paths of former EAPSI Fellows.

What happens if I don't answer this survey?

Participation in the survey is voluntary and nonparticipation will have no impact on you or your institution. Study participation will not affect your current NSF funding or future applications to NSF for funding/grants.

Has this study been reviewed and approved by an institutional review board?

Yes, the study was approved by Abt Associates' Institutional Review Board. If you have any concerns about your participation in this survey, please contact Teresa Doksum, Institutional Review Board Administrator at Abt Associates, at (877) 520-6835 or via email at irb@abtassoc.com.

Who is funding the study?

The study has been funded by the National Science Foundation under contract GS-10F-0086K. Abt Associates and AbtSRBI will complete the study.

Who are Abt Associates Inc and AbtSRBI?

Abt Associates is an independent research firm headquartered in Cambridge, Massachusetts. AbtSRBI is a wholly-owned subsidiary of Abt Associates specializing in large-scale data collection and public opinion research. NSF has contracted with Abt Associates and AbtSRBI to design and implement a survey of the graduate advisors of former participants in NSF's EAPSI program.
