A. INTRODUCTION

Direct certification is the process whereby school officials determine a child's eligibility for free school meals in the National School Lunch Program (NSLP) based on data provided by the State or local welfare office about participation in the Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF), or Food Distribution Program on Indian Reservations (FDPIR). Direct certification is generally implemented at the State or district level, or by mailing letters to all SNAP households in the State.

A1a With State-level matching, a State agency (usually Child Nutrition) is responsible for a system that matches a list of children in NSLP schools with a list of children in SNAP households using a common identifier or identifiers. This system can be set up in a variety of ways. Some examples include:

- A State agency matches State enrollment information with a State list of children in SNAP households. A list of students directly certified on the basis of this match is forwarded to districts.
- An initial match is conducted by a State agency. A list of matched students is sent to districts, who then verify the matches, get further information on students who are "potential" matches, or conduct other types of secondary matching.
- Districts upload enrollment information into a State-maintained computer or web-based system that conducts a match to a list of children in SNAP households. Students are directly certified on the basis of this match.

Does your State conduct matching at the State level for direct certification?

- Yes
 No

A1b With district-level matching, districts have primary responsibility for matching a list of children enrolled in their schools with a list of children in SNAP households using a common identifier or identifiers. Districts may use manual methods or their own computer system. Do any districts in your State conduct matching at the district level for direct certification?

- Yes
- No
