

Justification for change of 2050-0086

The purpose of this change request is to submit a form that was inadvertently not sent to OMB in the approved change on 1/11/2011. The change adjusted the currently approved Information Collection Request (ICR), OMB No. 2050-0086, EPA No. 1445.07 to account for use of Continuous Release Reporting Forms.

Although the Agency has had “forms” as part of guidance on how to report continuous releases, the forms were not approved by OMB for use in submitting information. During the course of renewals, some respondents have either requested or suggested that continuous release reporting forms be made available. Recipients of the continuous release reporting reports have also suggested that forms would make processing information easier.
