HUD Master Model (2007)

SHOPSelf-Help Homeownership Opportunities Program

To facilitate and encourage innovative homeownership opportunities on a national geographic diverse basis through self-help housing programs that requires a significant amount of sweat equity by the homebuyer toward construction or rehabilitation of the dwelling.

Need Statements

Need for Housing

There is a need to provide low-income persons with the opportunity for homeownership by using sweat equity and volunteer labor to lower the cost of the unit.

There is a need to develop self-help housing in designated areas at an average cost of \$15,000 or less per unit for land acquisition and/or infrastructure improvements.

Evaluation Process – These are standard requirements that HUD will expect every program manager receiving a grant to do as part of their project management.

- An evaluation process will be part of the on-going management of the program.
- Comparisons will be made between projected and actual numbers for both outputs and outcomes.
- Deviations from projected outputs and outcomes will be documented and explained.
- Analysis of data to determine the relationship of outputs to outcomes; what outputs produce which outcomes.

HUD Will Use The Following Questions To Evaluate Your Program

- 1. How many dwelling units were constructed?
- 2. How many dwelling units were rehabilitated?
- 3. What was the average number of sweat equity hours contributed to the program?
- 4. What was the average dollar value of sweat equity hours contributed to the program?
- 5. What was the average number of volunteer hours contributed to the program?
- 6. What was the average dollar value of volunteer hours contributed to the program?
- 7. How much money was saved as a result of the reduced sales price of homes constructed?
- 8. How much money was saved as a result of the reduced sales price of homes rehabilitated?

Carter-Richmond Methodology

The above Management Questions developed for your program are based on the Carter-Richmond Methodology1. A description of the Carter-Richmond Methodology appears in the General Section of the NOFA.
