ASTHO		Association	2010 State and Territorial Public Health Survey	The ASTHO 2010 State and Territorial Public Health Survey will be in the field from April 19 until June 18, 2010. The 2010 survey is the second survey in a longitudinal series about state/territorial health agency responsibilities, structure, planning and quality improvement activities, workforce, and more that provides core data for ongoing public health systems research and a source for tracking state public health performance and best practices. Information gathered from this survey will allow ASTHO to continue to: Provide comparable information about the nature and scope of state public health; Orient new health officials and support them throughout their tenure; Respond to lawmakers' questions in the context of health reform; Advocate for a stronger public health system.	State; Territorial		Workforce and Systems Development		<a href="http://www.astho.org/Research/Data-and-Analysis/">http://www.astho.org/Research/Data-and-Analysis/</a>	
ASTHO		Association	State Public Health Survey	This survey research aims to define the scope of state public health services, identify variations in practice among state public health agencies, and contribute to the development of best practices in governmental public health. The ASTHO Profile of State Public Health, Volume One highlights descriptive findings from ASTHO's first comprehensive state public health survey conducted in 2007 and 2008 and completed by all 50 states and the District of Columbia. The findings serve as a resource for state health officials, ASTHO, researchers and other organizations to: Define the value of state public health to governors, legislatures, and the nation; Promote and preserve adequate funding for crucial public health services; Effectively advocate on behalf of state health officials and public health.	State		Public Health Policy and Public Health Law; Partnerships		<a href="http://www.astho.org/Research/Data-and-Analysis/">http://www.astho.org/Research/Data-and-Analysis/</a>	
ASTHO		Association	Health Reform Survey	A health reform survey was conducted to describe the degree and type of state health official involvement in health reform, identify the topics covered by current state health reform efforts, and develop ways in which ASTHO can best support its members in their health reform efforts.	State		Partnerships		<a href="http://www.astho.org/Research/Data-and-Analysis/">http://www.astho.org/Research/Data-and-Analysis/</a>	
ASTHO		Association	Budget Cuts Survey	A series of budget cuts surveys were administered to state health officials in light of the economic turmoil confronting state health agencies. This data, along with the data compiled from the 2007 State Public Health Baseline Survey has been used to calculate job losses. This work was used to support the inclusion of the Prevention and Wellness funding in the economic stimulus package.	State		Workforce and Systems Development		<a href="http://www.astho.org/Research/Data-and-Analysis/">http://www.astho.org/Research/Data-and-Analysis/</a>	
ASTHO		Association	Minority Health Survey	With support from the Department of Health and Human Services' Office of Minority Health, ASTHO surveyed state and territorial health agencies on the ways that state and territorial health agencies address racial and ethnic minority health and health disparities. Of the 57 agencies surveyed, 46 returned responses.	State; Territorial			Minority Health Disparities	<a href="http://www.astho.org/Research/Data-and-Analysis/">http://www.astho.org/Research/Data-and-Analysis/</a>	
ASTHO		Association	Health Equity (publication)	With support from the DHHS Office of Minority Health, ASTHO surveyed state and territorial health agencies on racial/ethnic minority health and health disparities.	State; Territorial			Minority Health Disparities	<a href="http://www.astho.org/Research/Major-Publications/">http://www.astho.org/Research/Major-Publications/</a>

ASTHO		Association	ASTHO Profile of State Public Health, Volume One (2009) (publication)	With support from the Robert Wood Johnson Foundation and the Centers for Disease Control and Prevention, ASTHO surveyed state and territorial health agencies about their responsibilities, organization and structure, planning and quality improvement activities, workforce, and much more. All 50 states and the District of Columbia completed the survey.	State; Territorial		Workforce and Systems Development		<a href="http://www.astho.org/Research/Major-Publications/">http://www.astho.org/Research/Major-Publications/</a>	
ASTHO		Association	ASTHO Chartbook of State Public Health, Volume One (2010) (publication)	The Chartbook serves as a companion piece to the ASTHO Profile of State Public Health, Volume One, by providing in-depth tabular data on topics highlighted by the Profile. This publication is a useful statistical reference for state and local health departments, legislators, federal agencies, researchers, and others to better understand our nation's state public health infrastructure.	State; Territorial		Workforce and Systems Development; Partnerships		<a href="http://www.astho.org/Research/Major-Publications/">http://www.astho.org/Research/Major-Publications/</a>	
ASTHO		Association	Understanding State Public Health (2007) (publication)	Through a grant from the Robert Wood Johnson Foundation, ASTHO developed the Understanding State Public Health Project. This white paper describes the goals of the initiative, which include developing a comprehensive report to define the scope of the state public health functions and responsibilities, as well as a marketing plan that conveys the value of state public health to public health constituencies, elected officials, funders, and the general public.	State		Workforce and Systems Development; Partnerships		<a href="http://www.astho.org/Research/Major-Publications/">http://www.astho.org/Research/Major-Publications/</a>	
ASTHO		Association	Prescription Drug Overdose: State Health Agencies Respond (2008) (publication)	This report presents health agency leadership perspectives on the emergence of prescription drug overdose as a national public health problem. It also shows which prevention and monitoring strategies have shown promise, and the infrastructure, technology, prevention, partnership, and leadership required to reverse this rising trend.	State	Tobacco Use	Public Health Policy and Public Health Law; Health IT and Communications Infrastructure; Workforce and Systems Development; Partnerships		<a href="http://www.astho.org/Research/Major-Publications/">http://www.astho.org/Research/Major-Publications/</a>	
ASTHO		Association	2007 Public Health Workforce Report (publication)	Results of a survey that looked at the effects of budget cuts and the aging of the public health workforce on state public health agencies.	State		Workforce and Systems Development		<a href="http://www.astho.org/Research/Major-Publications/">http://www.astho.org/Research/Major-Publications/</a>	
ASTHO		Association	Ensuring Healthy Communities: Results of the 2006 State Environmental Health Directors Survey (publication)	ASTHO administered the State Environmental Health Services survey to SEHD members in November, 2006 and February, 2007. Data from forty-eight responding states and the District of Columbia were incorporated into the final report. States were asked to provide information about 16 environmental health programs and multiple activities conducted by state health agencies, either in the environmental health director's office or elsewhere in the agency. Survey results are intended to provide a snapshot of the environmental public health programs and activities, and to enhance communications among the SEHD - especially when making inquiries about specific programs. Results also provide a resource to states when considering program realignment and funding decisions.	State		Health IT and Communications Infrastructure; Workforce and Systems Development		<a href="http://www.astho.org/Research/Major-Publications/">http://www.astho.org/Research/Major-Publications/</a>

CDC	OSELS/NCHS	Federal Agency	National Survey of Family Growth (0920-0314)	The National Survey of Family Growth (NSFG) gathers information on family life, marriage and divorce, pregnancy, infertility, use of contraception, and men's and women's health. The survey results are used by the U.S. Department of Health and Human Services and others to plan health services and health education programs, and to do statistical studies of families, fertility, and health. 5000 persons of all ages are surveyed per year.	Local	HIV Teen Pregnancy		Contraception & Sterilization Teenage sexual activity & pregnancy Family planning and unintended pregnancy Infertility, adoption, breastfeeding Marriage, divorce and cohabitation Fatherhood involvement HIV risk behavior	<a href="http://www.cdc.gov/nsfg/">http://www.cdc.gov/nsfg/</a>	
CDC	OSELS/NCHS	Federal Agency	National Vital Statistics System (0920-0213)	The National Vital Statistics System is the oldest and most successful example of inter-governmental data sharing in Public Health and the shared relationships, standards, and procedures form the mechanism by which NCHS collects and disseminates the Nation's official vital statistics. These data are provided through contracts between NCHS and vital registration systems operated in the various jurisdictions legally responsible for the registration of vital events – births, deaths, marriages, divorces, and fetal deaths.	Local	Teen Pregnancy		Birth rates Birthweight Teen & nonmarital births Pregnancy Outcomes Method of delivery Preterm delivery Multiple births Infant mortality Life expectancy Causes of death Occupational mortality	<a href="http://www.cdc.gov/nchs/nvss.htm">http://www.cdc.gov/nchs/nvss.htm</a>	
CDC	OSELS/NCHS	Federal Agency	National Ambulatory Medical Care Survey (part of NHCS) (0920-0234)	The National Ambulatory Medical Care Survey (NAMCS) is a national survey designed to meet the need for objective, reliable information about the provision and use of ambulatory medical care services in the United States. Findings are based on a sample of visits to non-federal employed office-based physicians who are primarily engaged in direct patient care. 35,000 patients, 1200 physicians in office based practices, 280 physicians or mid-level providers from 95 community health centers are included in survey.	Local	HAI		Patient characteristics/clinical management Demographics, diagnoses, procedures, medications Provider/clinician characteristics Specialty, practice size, ownership Use of EMR	<a href="http://www.cdc.gov/nchs/ahcd.htm">http://www.cdc.gov/nchs/ahcd.htm</a>	More research required to determine if HAI is addressed in survey results
CDC	OSELS/NCHS	Federal Agency	National Hospital Ambulatory Care Survey (part of NHCS) (0920-0278)	The National Hospital Ambulatory Medical Care Survey (NHAMCS) is designed to collect data on the utilization and provision of ambulatory care services in hospital emergency and outpatient departments. Findings are based on a national sample of visits to the emergency departments and outpatient departments of noninstitutional general and short-stay hospitals. 100,000 patient visits, 360 hospitals with EDs, outpatient departments, or ambulatory surgery centers are included in survey.	Local	HAI		Patient characteristics Demographics, length of stay Diagnoses and treatment Facility characteristics Specialty volume Use of EMR	<a href="http://www.cdc.gov/nchs/ahcd.htm">http://www.cdc.gov/nchs/ahcd.htm</a>	More research required to determine if HAI is addressed in survey results
CDC	OSELS/NCHS	Federal Agency	National Survey of Residential Care Facilities (part of NHCS) (0920-0780)	The Centers for Disease Control and Prevention's National Center for Health Statistics (NCHS) is conducting a new study of residential care communities. The National Survey of Residential Care Facilities (NSRCF) is a first ever survey of residential care providers. Included are residential care facilities; assisted living residences; board and care homes; congregate care; enriched housing programs; homes for the aged; personal care homes; and shared housing establishments that are licensed, registered, listed, certified, or otherwise regulated by a state. NSRCF is designed to produce national estimates of these places and their residents.
