Form Approved: OMB No. 0920-0234 Exp. Date 02/28/2013

National Ambulatory Medical Care Survey 2011 Patient Record Folio

Physician ID:									
WEEK OF –		FROM	Month [Day		ТО	Month [Day	
SURVEY WEEK		Mon.	Tues.	Wed.	Thur.	Fri.	Sat.	Sun.	Total
Complete a Patient Record for patient SW and	Number of patient visits								
every TE nth patient thereafter.	Number of records completed								
Please return the entire Folio with both the completed and blank forms at the completion of the survey week. Thank you!									

Notice – Public reporting burden for this collection of information is estimated to average 11 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a current valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing burden to: CDC/ATSDR Information Collection Review Office, 1600 Clifton Road, MS D-74, Atlanta, GA 30333, ATTN: PRA (0920-0234).

GENERAL INSTRUCTIONS

See card in pocket for instructions on how to complete Patient Record.

REPORTING DATES	Your reporting	orting dates are:					
 	Monday,		through Sunda	у,			
PATIENT SIGN-IN SHEET	Record the name of every patient seen during the Reporting Period on a Sign-In Sheet maintained by your office. Record each patient in the order registered by the receptionist or seen by the provider. If two or more patients are seen during a single provider visit, the patients should be listed in the sequence registered or the sequence seen. It is important to record every patient visit including those not seen by the provider but attended to by the staff. Patients who visit the provider more than once during the Reporting Period should be recorded on the Sign-In Sheet at each visit.						
PATIENT RECORD	Follow the Sampling Pattern below to determine for which visit(s) a Patient Record should be completed.						
	START WIT	н	TAKE EVERY				
	The START WITH designates the FIRST PATIENT for whom a Patient Record should be completed. The TAKE EVERY designates every patient thereafter for whom a Patient Record should be completed. For example, for a Start With of 2 and Take Every of 3, a Patient Record will be completed for the second patient listed on the office Sign-In Sheet and every third patient listed thereafter (e.g., 2, 5, 8, etc.). It is essential that the Take Every Number is extended each day from one Sign-In Sheet to another. For example, if your office uses a new Sign-In Sheet each day, then the Take Every Number has to be extended from the last patient visit selected on Monday to the new list on Tuesday. If a single Sign-In Sheet is used during the entire Reporting Period, then the Take Every Number needs to be extended as new patient names are added to the list.						
İ	Please refer to the NAMCS-26 Instruction Book for more detailed information on the sampling pattern.						
DEFINITIONS	1. An ambulatory patient is an individual presenting for personal health services, not currently admitted to any health care institution on the premises. Include patients the physician sees; and patients the physician does not see but who receivant from a physician assistant, nurse, nurse practitioner, etcare
