	1. IGERT Project Characteristics, Highlights, and Other			
	Information			
	Project Characteristics			
	- 1 Tojett Gharacteriones			
	Please indicate up to three NSF directorates that most closely correspond			
	to your interdisciplinary research theme.			
	BIO –Biological Sciences			
	CISE – Computer and Information Science and Engineering		X	
	ENG–Engineering			
	GEO-Geosciences APRO Made de la laboración de laboración de laboración de la laboración de la laboración de labor			
	MPS–Mathematical and Physical SciencesOPP–Office of Polar Programs			
	SBE–Social, Behavioral, and Economic Sciences			
	Did you support any IGERT trainees during the current project year?			
	Yes/ No		X	
	Considering the IGERT trainees as a group, how do they compare with			
	graduate students you usually see in terms of their academic/research			
	potential?			
	Far superior to our usual graduate students		X	
	Somewhat better than our usual graduate students		Λ	
	About the same as our usual graduate students			
	 Somewhat less promising or less successful than our usual graduate students 			
	Much less promising or less successful than our usual students			
	How do trainees in your program earn their doctoral degrees? [mark all			
	that apply]			
	Trainees earn their degrees from the IGERT			
	multidisciplinary/interdisciplinary program.		X	
	 Trainees earn their degrees from traditional single-discipline departments. Trainees earn their degrees from multidisciplinary/interdisciplinary 		21	
	programs, centers or units other than IGERT.			
	• Other (certificates, etc.)			
	Please specify:			
	Does your IGERT project include undergraduate involvement?		X	
	Yes/ No		11	
	Does your IGERT project include postdoctoral involvement?		X	
	Yes/No			
	Indicate the amount of funds from the current year of IGERT support			
	that will be carried over to the next year:			
	1. Total funds carried over to the next year		X	
	2. Participant support costs carried over to the next year			
	3. Stipends carried over to the next year

	Research Achievements			
	Please describe up to three interdisciplinary research achievements/discoveries/outcomes that demonstrate how your IGERT has been particularly effective in attaining the interdisciplinary research goals you set out to achieve during this reporting period. These might be important research findings extending knowledge in your interdisciplinary theme research area or research advances made possible through the interdisciplinary teamwork in your IGERT project.			X
	[The PI has an option to make each achievement available for use on the IGERT Resource Center Web site, viewable by the general public]			
	Please describe up to three achievements/outcomes that illustrate exceptional added value to the trainees' educational experience during this reporting period. Please focus on overall programmatic achievements, rather than achievements of individual trainees. [The PI has an option to make each achievement available for use on the latest achievements.]			X
	IGERT Resource Center Web site, viewable by the general public] Trainee Achievements Please describe up to three research or education achievements/outcomes, involving either a single trainee or a group of trainees made possible through the participation of trainees in your IGERT project during this reporting period. [The PI has an option to make each achievement available for use on the IGERT Resource Center Web site, viewable by the general public]			X
	Please identify and describe up to three key barriers you have encountered in the process of implementing your IGERT project during this reporting period. For each barrier identified, briefly describe how your project has responded. [The system collects the barriers and responses as separate data elements]		X	
	Outreach Activities			X
	Please report any outreach activities involving your IGERT that occurred

		Sta Pai	Ch Ch	Pro
	during this reporting period. Outreach activities include your IGERT project, IGERT faculty and/or IGERT Trainees being featured in the			
	media (e.g., TV, radio, magazine articles) or talks, presentations, or			
	workshops given to school groups, civic groups, non-scientifically based			
	professional groups, members of the government, or the general public.			
	Please mark the checkbox if you do not have any Outreach Activities to			
	report.			
	For each activity:			
	1. Short Title			
	2. Name of the media outlet or organization for which outreach was			
	done			
	3. Date of the activity			
	4. Brief description of the activity, including the type of activity			
	and the names of the IGERT individuals involved.			
	NSF Highlights			X
	Each year, NSF program officers are asked to write "Highlights" (formerly known as "Nuggets") on the results of NSF research and education awards. These Highlights are used to help assess NSF's performance in attaining the strategic outcome goals outlined in the NSF 2006, 2011. Strategic Plan and to chare suggested with various groups.			
	2006-2011 Strategic Plan and to share successes with various groups.			
	Your Highlight will probably relate to one of the achievements reported			
	in sections 1b, c or d, but in greater detail and with images. When			
	writing your Highlight, please clearly describe how the interdisciplinary			
	theme of your IGERT project made this work possible, as distinct from			
	what might have been possible through only a single-discipline research			
	or education grant. Also, please write the Highlight such that a general			
	audience can grasp the importance, value and merit of the research, the			
	educational outreach or whatever results you are highlighting.			
	Starting with a statement of what the research team has ashieved and			
	Starting with a statement of what the research team has achieved and why it is important and then going on to explain what problem is being			
	solved, or obstacle is being overcome, or new discovery that was made			
	is a great way to write a Highlight for maximum effectiveness.			
	Reporting Highlights is related to requirements under the Government Performance and Results Act (GPRA).			
	Please respond only if you have something appropriate to share for this

		Sta Pa Ch	Ch II P	Pr
	reporting period.		,,,,,	
	reporting period.			
	Guidelines for Writing Highlights			
	• Write for a general audience . Common uses for highlights include the following:			
	program monitoring by NSF staff; reporting to Congress on NSF goal attainment;			
	demonstrating achievements in the NSF's annual Budget Requests, Performance			
	and Accountability Reports (PAR), and other documents; and providing information for the general public. Well-written, informative Highlights submitted			
	here may serve several purposes and thereby eliminate duplicate writing efforts			
	later.			
	Include images. NSF highlights and images are used not only by the Advisory			
	Committee for GRPA Performance Assessment, but also for illustration, in the			
	NSF's annual Budget Requests, Performance and Accountability Reports (PAR),			
	and other documents. Clear, colorful images (pictures, graphs, charts, etc.) greatly			
	enhance the value of highlights.			
	• Provide sufficient information to describe the research and the results so that the			
	IGERT Program Officers can determine whether or not a specific objective (and			
	therefore, outcome goal) was met and its most valuable use.			
	• Start with a statement of what the research team has achieved, and then go on			
	to explain why it solves a problem or overcomes an obstacle. Do not start with a			
	lengthy explanation of the problem to be solved. Example: "Prof. Blivett and her team at the University of Eutaw have discovered/achieved/developed XYZ. This			
	was hard/remarkable/useful/world-changing because or this seminal			
	development could lead to practical applications in"			
	• Include the location and/or lead institution for the research and the names of all			
	principal investigators.			
	• Include an explicit statement that NSF is supporting this work (this can usually			
	be done very quickly in passing, e.g., "NSF-funded researchers at Stanford			
	University have demonstrated", or "Astronomers working at NSF's Gemini			
	Observatory have discovered")			
	Spell out NSF program names. Be sure to spell out acronyms.			
	For each highlight:			
	1. Descriptive title for this Highlight			
	1			
	2. Please indicate the primary and secondary NSF strategic goal(s)			
	that best describe the highlight			
	[For each NSF goal listed, the PI selects either primary or			
	secondary]			
	3. Describe the achievement/result that is the Highlight			
	4. How does this activity address the primary and secondary NSF			
	strategic goals that you marked above?			
	For each Highlight Image:			
	1. Descriptive title for this Highlight image			
	2. Upload image file (bmp, gif, jpeg, pdf, png, or tiff only)			
	3. Does NSF have permission to use this image?			
	Yes/No			
	4. Image credits (Required only if you answered "yes" to the

	 Mark the following components of multidisciplinary/interdisciplinary research preparation that apply to the majority of IGERT trainees involved in your project during this reporting period. (Mark all that apply) Trainees took coursework/training in research methods, practices and instrumentation in their primary discipline equivalent to traditional graduate students. Trainees undertook formal coursework/training in research methods, practices, and instrumentation in their primary discipline equivalent to traditional graduate students. Trainees had practical, hands-on laboratory and/or field experience in conducting research across the breadth of disciplines in the IGERT program. Trainees undertook formal coursework/training across the breadth of disciplines encompassed by the IGERT project. Trainees undertook formal coursework/training in both the ethical conduct of research and ethical conduct related to the themes encompassed by your IGERT project. Other preparation to conduct high-quality research (please specify:		X	
	Trainee Preparation in Professional Skills		X	
	 Mark the following components of professional skills development that apply to the majority of IGERT trainees in your project during this reporting period. (Mark all that apply) Trainees undertook coursework/training that included regular faculty critique of and feedback on professional writing. Trainees authored, submitted or published research papers in refereed journals. Trainees took coursework/training (e.g., brown bags, seminars) that included regular critique of and feedback on professional speaking/presentation skills. Trainees made presentations at academic/scientific professional conferences or meetings. Trainees presented results from their IGERT to professional, non-academic audiences (e.g., industry, government). Trainees undertook coursework/training to develop media-based or information technology-based communication skills. Trainees produced multimedia materials, Web sites, or other cyber-enabled tools to communicate the results of their IGERT activities to external audiences. Trainees used multimedia materials, Web sites, or other cyber-enabled tools as part of their interdisciplinary scientific training and collaboration. Trainees received training in team-building and project management skills. Trainees received training in effective time and task management. Trainees participated as members of teams engaged in joint research, education, and/or outreach efforts.
