INSTRUCTIONS FOR COMPLETING FORM RAC-55

Section 989.173(f)(3) of the Administrative Rules and Regulations of Marketing Order No. 989 (7 CFR Part 989) requires handlers to provide information to the Raisin Administrative Committee (RAC) regarding the weighted average price paid to producers and dehydrators for free tonnage raisins, natural condition basis, during the period specified by the RAC, and the quantity of raisins for which such average was computed.

1. The notification received with the form will specify the period and the varietal types for which the weighted average price must be calculated and the date the report is due at the RAC.

2. Enter the specific period to and from dates for which the calculations are being made.

3. By varietal type, calculate, in tons, the total amount of natural condition free-tonnage raisins purchased from producers and dehydrators during the period. Enter these amounts for each specified varietal type in Column (1).

4. By varietal type, calculate the total amount paid for the raisins entered in Column (1). Divide the total amount paid by the total tons entered in Column (1). This will be the weighted average price per ton paid for the specified varietal type. Enter the weighted average price per ton in Column (2).

5. Enter the handler name. Sign and date the report in the spaces provided.

Consult RAC Field Representative on any points not clear to you.
