

WARNING

If you have used the MAF/TIGER Partnership Software (MTPS) for any other Census programs, **including the 2009-2010 School District Review Program**, be aware that installing the enclosed accompanying data will delete any previous MTPS data installations and any work you have already completed, regardless of Census program (BAS, LUCA, PSAP, RDP, etc.).

To avoid this, it is recommended that the installation of these materials be done on separate computers or the data should be installed into different folders.

To install the data into different folders:

- a.) Before beginning the installation, navigate to the C:\MTPSData folder.
- b.) Rename the existing MTPSData folder using the program initials so you can easily identify it later. (e.g. C:\MTPSData_PSAP or C:\MTPSData_RDP)
- c.) Proceed with the installation. When the installation is complete you will again have a folder titled C:\MTPSData but it will now contain your School District data.
- d.) If you need to switch back to one of these other programs, first rename the current C:\MTPSData folder to C:\MTPSData_SD or another memorable name)
- e.) Rename the program's folder that you want to use to C:\MTPSData.
- f.) Now, launching the software will open that dataset.

Please contact a member of the School District Review Program team at 301-763-1099 or geo.school.list@census.gov with any questions or concerns.
