2. Is the information you regularly need...

○ Domestic (U.S.)

○ International

○ Both domestic (U.S.) and international

3. What information about regulatory and standards development or conformity assessment does your organization need but has been unable to find?

[text box]

2. National Institute of Standards and Technology (page 2)

*4. Have you ever submitted a topic proposal for a workshop administered by the *Standards in Trade (SIT) Program* **of the National Institute of Standards and Technology (NIST)?**

○ Yes

○ No

The National Institute of Standards and Technology (NIST) invites all interested parties, including U.S.-based manufacturers, U.S. industry and trade associations and federal government agencies, to submit recommendations and suggestions for workshops covering specific sectors and targeted countries or regions of the world where training in the U.S. approaches to development and use of standards, including assessment of conformity to standards, may facilitate trade, increase U.S. exports, and/or benefit U.S. industry. Standards in Trade (SIT) workshops are designed to introduce U.S. stakeholders to emerging standards and conformity assessment issues in other countries and regions; identify regulatory information and market access issues; and provide timely information to foreign officials on U.S. practices in standards, metrology and conformity assessment.

For more information or to submit a workshop proposal, [click here](#).

3. Standards In Trade (SIT) Proposal Submission - No (page 3)

5. Why have you <u>not</u> submitted a workshop topic proposal to the *Standards in Trade (SIT) Program*? Select all that apply.

☐   Unaware that workshop topic submissions were accepted

☐   Submission process is too onerous/difficult

☐   Standrads in Trade program is not relevant to the work my organization does

☐   Submission process/instructions are unclear

☐   Could not see sufficent benefits in submitting a proposal

[   ]

5. National Institute of Standards and Technology (page 5)

*8. Have you ever participated in workshops offered by the *Standards in Trade (SIT) Program*?

○ Yes

○ No

The NIST Standards in Trade (SIT) Workshop Program provides opportunities for cooperation and information exchange on important topics related to standards, conformity assessment, and trade that are vital to the success of U.S. businesses. The knowledge gained provides a basis for increasing trade opportunities in key foreign markets, particularly where such practices differ substantially from those in the United States.

Each SIT workshop is targeted to aid U.S. industry in becoming more competitive through increased transparency of market and regulatory requirements, promotion and use of standards, and cooperative information exchange. Foreign and U.S. audiences alike gain a deeper understanding of standards development processes and technical requirements – paving the way for U.S.-produced goods.

*21. Has your organization used the NIST website *Standards.gov*?

◯   Yes

◯   No

In compliance with the National Technology Transfer and Advancement Act of 1996, Federal agencies are adopting voluntary, private-sector standards whenever possible instead of creating proprietary, non-consensus standards. This mandate creates a critical need for close coordination and information sharing across sectors, agencies, and levels of government—a need filled by the robust website Standards.Gov.

Standards.Gov provides a wealth of up-to-date information on current standards and recent changes relevant to Federal agencies and organizations. The site is maintained by the National Institute of Standards and Technology in cooperation with multiple partners.

*35. Has your organization used the NIST Technical Barriers to Trade (TBT) notification service, *Notify U.S.*, provided by the *U.S. Inquiry Point*?

○ Yes

○ No

The United States is a Member of the World Trade Organization (WTO). Under the Agreement on Technical Barriers to Trade (TBT) all Members report proposed technical regulations that affect trade with other Members. WTO Members review and comment on these regulations while they are in a draft stage and subject to revision. In this way, international free trade, international transparency, and international harmonization of standards are encouraged.

Notify U.S. informs you every day with in-time tracking and reports on proposed technical regulations issued by more than 150 Member countries in the World Trade Organization, the U.S. Federal government, the 50 U.S. States, and the District of Columbia.

For more information, click here.
