- Report units of all ENERGY STAR qualified models deployed in the U.S. under your ENERGY STAR partnership.

This form is programmed to calculate your total shipments. Therefore, EPA strongly encourages you to fill it out using Microsoft Excel, instead of filling out a printed copy. Estimates of shipments are not accepted. Product Type definitions are available in the Program Requirements at www.energystar.gov/specifications.

¹ This column applies to Set-top Boxes qualified to Version 2.0 (effective January 1, 2009 through August 31, 2011). Under Version 2.0, all Set-top Boxes counted equally toward meeting the Service Provider Partner Purchase Requirements. This is in contrast to Version 3.0.

² Purchases shall be counted in the year in which Service Provider takes delivery.

³ This column applies to Set-top Boxes qualified to Version 3.0 (effective September 1, 2011). Under Version 3.0, Thin Clients and Set-top Boxes with Deep Sleep Capability receive a 50% premium (i.e., count as 1.5 boxes) toward meeting the Service Provider Partner Purchase Requirements.

⁴ Report unit purchases of Thin Client/Remote boxes with Deep Sleep Capability in this row. Premiums for Thin Client/Remote boxes and boxes with Deep Sleep Capability cannot be combined for a single Set-top Box. That is, a Thin Client/Remote box with Deep Sleep Capability can receive only one 50% premium (i.e., count as 1.5 boxes) toward meeting the Service Provider Partner Purchase Requirements.
