A Study of Fishing in North Carolina 116 John Street, Suite 800 New York, NY 10038

COMMONLY ASKED QUESTIONS

Q: How did you get my address?

A: Your address was randomly selected from among all of North Carolina's addresses. It was selected using scientific sampling methods to represent other households in your part of the state.

Q: Nobody in my household fishes. Should I respond to the survey?

A: Yes. It is important that we gather information about households that do not fish as well as those who do. Once we receive your completed questionnaire, you will not be sent any additional mailings such as replacement questionnaires.

Q: Why can't you interview another household instead of mine?

A: In order to make sure final results of the study are accurate, receiving information about your household is important to us. Households selected for this study were chosen using scientific sampling methods and your responses cannot be replaced by others.

Q: How will the information I provide be used?

A: Information from this study will be used to improve the monitoring of North Carolina's fishing activity. All information will be kept confidential; It will be combined with information from other households to produce statistical summaries and reports.

Q: How much time will this survey take?

A: On average, it should take less than five minutes for you to respond, including the time for reviewing instructions, and completing and reviewing the collection of information.

Q: Who is sponsoring the survey?

A: This study is sponsored by the National Oceanic and Atmospheric Administration. Questions regarding the study can be directed to Rob Andrews at National Oceanic and Atmospheric Administration by calling 301-713-2328.
