Attachment B9: Pilot Test Results of Survey by Residents

The sections of the Pre-Survey—Sections IIA, III (questions 14–16), IV (questions 4 and 5), and Section V in Attachment B2-2—not pilot tested by medical students were completed by nine internal medicine residents at University of Pennsylvania Medical School. It took respondents approximately 6 minutes to complete the sections. (Note: Survey numbering has been revised since pilot.)

Issue	Changes Made
1. Time to complete survey sections. 2. The original survey contained two questions with unclear instructions. The respondents were asked to order the choices from 1 to 5 but one respondent just entered a single digit.	1. No changes. Average time to complete sections was approximately 6 minutes. 2. The instructions for those two questions were revised to make them clearer.

Comments: There were no complaints or other critical comments expressed by the nine respondents on the appropriateness of the questions or other topics.
