Attn: Health Care Professional

Thank you for completing the survey to help evaluate AHRQ's videonovela, *Aprende a vivir*.

The Agency for Healthcare Research and Quality, part of the U.S. Department of Health and Human Services, developed the videonovela, *Aprende a vivir*, to help Latinos with type 2 diabetes face challenges related to managing their condition. By combining critically important health messages with entertainment in a form familiar to Latinos, this videonovela can help reinforce the important work done by health departments, doctors, nurses and *promotores de salud* to improve the health of people with type 2 diabetes.

Feel free to take home this videonovela kit, which includes selected materials in Spanish and English on type 2 diabetes, high blood pressure and cholesterol, and safe use of medication. The DVD has versions of the videonovela with both Spanish and English captions. If you are interested in ordering additional free copies of any of these materials, please send an email to Jessica.Reed@ahrq.hhs.gov.

Sincerely,

Karen Carp
