Abstract: This information collection implements requirements of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) (ESA). There are no corresponding Service regulations for the ESA post-delisting monitoring requirement. This IC also implements the Migratory Bird Treaty Act (16 U.S.C. 704) and Service regulations in chapter I, subchapter B of title 50 of the Code of Federal Regulations (CFR).

The American peregrine falcon was removed from the List of Endangered and Threatened Wildlife on August 25,

1999 (64 FR 46542). Section 4(g) of the ESA requires that all species that are recovered and removed from the List of Endangered and Threatened Wildlife (delisted) be monitored in cooperation with the States for a period of not less than 5 years. The purpose of this requirement is to detect any failure of a recovered species to sustain itself without the protections of the ESA. We work with relevant State agencies and other species experts to develop appropriate plans and procedures for

systematically monitoring recovered wildlife and plants.

The American peregrine falcon has a large geographic distribution that includes a substantial amount of non-Federal land. Although the ESA requires that monitoring of recovered species be conducted for not less than 5 years, the life history of American peregrine falcons is such that it is appropriate to monitor this species for a longer period of time in order to meaningfully evaluate whether or not the recovered species continues to maintain its

recovered status. The Monitoring Plan for the American Peregrine Falcon is available on our Web site at <http://library.fws.gov/pubs1/peregrine03.pdf>. Formal collection of monitoring data commenced in 2003. Rangewide population monitoring of American peregrine falcons under the Monitoring Plan will take place every 3 years through 2015.

We will use the information supplied on FWS Forms 3–2307, 3–2308, and 3–2309 to review the status of the American peregrine falcon in the United States and determine if it remains recovered and, therefore, does not require the protections of the ESA:

(1) FWS Form 3–2307 (Peregrine Falcon Monitoring Form) addresses the reporting requirements to record observations on the nesting pair, and the numbers of eggs and young during each nest visit. Each territory will be visited at least two times.

(2) FWS Form 3–2308 (Peregrine Falcon Egg Contaminants Data Sheet) addresses the reporting requirements to record data on eggs collected opportunistically during a nest visit.

(3) FWS Form 3–2309 (Peregrine Falcon Feather Contaminants Data Sheet) addresses the reporting requirements to record data on feathers collected opportunistically during a nest visit. Once collected, the eggs and feathers are archived in a deep freeze for analysis at a later time.

Comments: On March 28, 2011, we published in the **Federal Register** (76 FR 17147) a notice of our intent to request that OMB renew approval for this information collection. In that notice, we solicited comments for 60 days, ending on May 27, 2011. We received one comment. The commenter stated that the peregrine falcon should not have been removed from the List of Endangered and Threatened Wildlife, but did not address the information collection requirements or the burden estimates. We have not made any changes to our information collection requirements.

We again invite comments concerning this information collection on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- The accuracy of our estimate of the burden for this collection of information;
- Ways to enhance the quality, utility, and clarity of the information to be collected; and
- Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.

Dated: July 1, 2011.

Chief, Division of Policy and Directives Management, U.S. Fish and Wildlife Service.
