SECTION SV: SEXUAL VIOLENCE

SV_INTRO

Women and men may experience unwanted and uninvited sexual situations by strangers or people they know well, such as a romantic or sexual partner, friend, teacher, coworker, supervisor, or family member. Your answers will help us learn how often these things happen. Some of the language we use is explicit, but it is important that we ask the questions this way so that you are clear about what we mean. The questions we ask are detailed and some people may find them upsetting. The information you are providing will be kept private. You can skip questions you don't want to answer and you can stop at any time.

We are going to ask you about different types of unwanted sexual situations. In general, these are: unwanted sexual situations that did NOT involve touching and situations that DID involve touching. I will also ask you about situations in which you were unable to provide consent to sex because of alcohol or drugs, situations where you were sleeping and unable to provide consent to sex, and about your experiences with unwanted sex that happened when someone used physical force or verbal pressure.
