

II. Current Action

Office of Management and Budget clearance is being sought for the Producer Price Index survey.

The PPI collection is not a one-time project with an end date. The purpose of the PPI collection is to accumulate data for the ongoing, monthly publication of the PPI family of indexes. The Bureau of Labor Statistics must continue collecting data for the PPI since both policy and business planning are affected by the completeness of the description of price trends. Dollar-denominated measures of economic performance, such as Gross Domestic Product, require accurate price data in order to convert nominal to constant-dollar values. Inflation-free national income accounting figures are vital to fiscal and monetary policy-makers when

setting objectives and targets. It is conservatively estimated that hundreds-of-billions of dollars worth of contracts and purchase agreements employ PPIs as part of price-adjustment clauses. Failure to calculate data would tend to extend the time frame required for accurate recognition of and appropriate adaptation to economic events.

III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.
- Evaluate the accuracy of the agency's estimate of the burden of the

proposed collection of information, including the validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
