

1405-0158 Additional New Questions Justification Document 6/22/2010

This submission:

- Adds 41 additional questions to the already approved generic collection for a new program evaluation

The U.S. Speaker and Specialists Program evaluation was developed after the original submission of this collection. Due to the nature of this new program, evaluation questions necessary to collect the data required did not already exist within that database. Therefore, 41 new questions had to be developed to address the specific nature of this program evaluation. This new set of questions for approval has been compiled and submitted as a separate document with this justification.
