Specify: New, Amendment or Renewal Application (Applicant View)

The *Specify: New, Amendment or Renewal Application* screen allows users to specify whether the application is for a New, Amendment, or Renewal permit.

Applicants are given the option to select a permit number from a drop down. Permits which are eligible for amendment or renewal may be selected from the drop down. If a permit is not eligible, it is grayed out.

Importer Information

Unknown City and ZIP Code Combination

Data validation checks are performed by the system for the address information entered on the Importer Information page, Shipper Information page, and the Originating Lab Entry page on the 16-7. The system checks to see that both that the zip code itself is valid and also that the combination of city and ZIP code are valid. If either data validation fails, then the Unknown City and ZIP Code Combination page is displayed. If the combination of city and zip code is not valid, the user has the ability to bypass the error and continue.

Below is the screen displayed for an invalid city and zip code combination entered on the Importer Information page.

The screenshot displays the USDA APHIS ePermits interface. At the top, the USDA and APHIS logos are visible, along with the text "United States Department of Agriculture Animal and Plant Health Inspection Service ePermits". Below the logos, there are navigation links for "Home" and "Printable Version". The main heading reads "VS Form 16-3 Application for Permit To: Import or Transport Controlled Material or Organisms or Vectors" with "Application No. 10069003". A progress bar shows the current step as "Importer" (highlighted in blue), with other steps including "Type of 16-3", "Mode Of Transportation", "Shipper", "Product", "VS16-7 Form Main", "Attachments", and "Certify & Pay".

The error message is titled "Unknown City and ZIP Code Combination" and includes a legend: "* = Required field". The error details are as follows:
