Products/Services: Z Corporation develops, manufactures, and markets the world's fastest 3D printers - machines that produce handheld models quickly, easily, and inexpensively from computer-aided design ("CAD"), building information modeling ("BIM"), and other digital data - and the world's most portable 3D scanners. Z Corp.'s 3D printers are used by companies to make prototypes ranging from toys for market feedback to fan blades for functional testing. In the same way that conventional desktop printers provide computer users with a paper output of their documents, 3D printers provide 3D CAD and BIM users a physical prototype of real world objects such as a mobile phone, an engine manifold, a camera, or a scale model building.
