## Example:

## *M. tuberculosis*/NTM Case History Form – NTM Supplemental Information

## **Strain O** – *M. marinum* Case History

| Patient:         | 39-years old   |
|------------------|--|
| Gender:          | Male   |
| Medical History: | HIV-positive   |
|                  | Developed multiple cutaneous nodules on his hand and forearm   |
| Patient Hobbies: | Maintains a tropical fish aquarium   |
|                  | Because of his current anti-retroviral therapy, the physician does not wish to use a rifampin-containing regimen and asks for susceptibility testing to be performed on this isolate of <i>Mycobacterium marinum</i> . |
