

## **Narrative of Revisions**

*The purpose of the Narrative of Revisions is to clearly indicate revisions to a collection since the previous approval*

Collection Title: Safety Approval of Cargo Containers

OMB Control No.: 1625-0024

Current Expiration Date: 06/30/2011

Collection Instruments: Instructions

The change in burden hours is an ADJUSTMENT. There is no proposed change to the reporting and recordkeeping requirements of this collection. The reporting and recordkeeping requirements and the methodology for calculating burden remain unchanged, with one exception (see below).

The following listed below are revisions to the collection:

- Decrease in burden (respondents/responses/burden hours) is due to a decrease in the U.S. flag container owner and manufacturer population (decrease in respondents (-29), responses (-9,429), burden hours (-1,824)).
- Based on input from approval authorities, we revised the “Review by approval authority of container design” burden per response estimate from 6 to 40 hours.
- Updates are provided for cost burden associated with this collection of information.
- USCG has created printable instructions for this collection of information.
