NASA-Langley External Customer/Partner Satisfaction Assessment

Thank you for taking time to provide us with your feedback. The survey has 20 main questions with room for additional comments. We anticipate this should take no longer than 30 minutes to complete.

Your response, including additional comments are an essential component in helping us determine our areas of strength as well as those which need improvement across all mission areas we support. We need your feedback in order to determine, from an integrated perspective, those areas where we may need to take systemic action to improve the technical quality and/or the delivery of our products and services as well as your experience in working with us. We appreciate your candid, honest and constructive input.

Optional Information:
