

**Select Agent Distribution Activity (SADA): Request for Select Agent
(OMB Control No. 0920-0591)
Request for Reinstatement without change**

B. Collection of Information Employing Statistical Methods

Statistical methods are not being applied to the information. For process see flow chart (Attachment F).

1. Respondent Universe and Sampling Methods

Sampling methods are not applicable. This activity is for obtaining the necessary information for select agent distribution.

2. Procedures for the Collection of Information

The application process will include having respondents download the application online and complete all sections on the paper. They will then mail the signed application packet to the SADA Administration for processing.

3. Methods to Maximize Response Rates and Deal with Nonresponse

Methods to maximize response rates and deal with nonresponse are not necessary. If respondents do not need the requested material, they will not apply.

4. Tests Procedures or Methods to be Undertaken

No test procedures will be done. This is an application process for qualified requestors to receive select agents.

5. Individuals Consulted on Statistical Aspects

Consultation on statistical aspects is not necessary for this activity. There is no data to be analyzed.
